Sadat says question of Sinai oil settled

CAIRO, Feb. 2 (Agencies) — President Anwar Sadat said Friday that the Sinai oil is not a problem binding a peace treaty with Israel, the official Middle East News Agency (MENA) reported. "Israel has offered to pay the international prices for the Sinai oil and we have accepted," MENA quoted Sadat as saying.

He said: "There are no problems or difficulties on this oil issue." The oil concerned is in the part of the Sinai peninsula which Israel would hand back to Egypt under the proposed treaty. Sadat said Egypt would wait

to hear from President Carter on the next step for reviving the stalled peace talks. Sadat, who was inspecting new houses under construction at his Nile Delta village of Mit Abul Kom told reporters that President Carter is currently busy with Chinese Vice-Premier Teng Hsiao-ping "but I hope to hear from him soon."

Earlier Thursday Prime Minister Mufapha Khalil declared that Egypt is prepared to open a dialogue with the Arab countries on the peace process with Israel. "We stretch our hands to sister Arab countries for that dialogue," he said.

Tel Aviv denies

Israeli jets strafe south Lebanon area

BEIRUT, Feb. 2 (R) — The right-wing Phalangist radio said Israeli warplanes Friday strafed Amnoun castle and the neighborhood in the eastern sector of southern Lebanon.

The raid was preceded by an Israeli artillery bombardment, it said.

No other details were immediately available. The radio said Israeli planes flew over the southern region throughout Thursday and people in the area had been in a state of alert, for any surprises.

In Tel Aviv, the Israeli army denied the Phalangist radio report. A spokesman described the Beirut reprint as "complete untrue."

Khaddam conveys message to Fahd

JEDDAH, Feb. 2 (SPA) — Syrian Foreign Minister Abdul Hakeem Khaddam left here Wednesday at the end of a 24-hour visit during which he conveyed a verbal message to Crown Prince Fahd from President Hafez Assad.

The Syrian minister, who arrived in Jeddah Thursday, was seen off by chief of Royal Protocol Ahmad Abdul Wahab, head of protocol at the foreign ministry, Salim Sumtani, and the Syrian ambassador to Saudi Arabia.

He said Israeli observers had noted some exchanges of fire between Phalangist and leftist, and Palestinian forces in the Amnoun area recently. But he claimed neither Israeli planes nor artillery had been in action.

An informal, occasionally broken, truce has been in force in the south since last month's heavy artillery exchange between Israeli gunners and Palestinian commandos and their leftist allies.

Earlier Friday, Lebanese President Elias Sarkis called in the U.S. ambassador in Beirut, John Gunther Dean, for an hour's discussion on the situation in the troubled south.

"When a people is deprived of its national freedom they will fight for it," Awnery said. "Before the state of Israel was established I was a member of Mr. Begin's underground movement and I know I would never have been satisfied with anything less than national freedom. So it is not such a great leap of the imagination to realize that the same thing is bound to happen to the Palestinians."

Formal talks between the Yugoslav leader and the ruler of Kuwait Sheikh Jaber Al-Ahmad Al-Sabah are due to begin Saturday on a wide range of bilateral, Arab and nonaligned issues.

Tito is expected to urge Arab states to close their ranks in efforts to resolve the conflict with Israel.

The political turmoil in Iran is also expected to be discussed by the two heads of state, informed sources said.

Developments in the non-aligned movement will also be a subject of the talks. President Tito is a co-founder of the movement created more than two decades ago.

Tito is also expected to seek an expansion of Yugoslav-Kuwaiti economic cooperation as well as Kuwaiti

loans and other facilities to help offset his country's foreign trade deficit, the sources said.

The president, on the first stop of a two-week trip which will also take him to Iraq, Syria and Jordan, visited Kuwait Towers, a tourist landmark being constructed by a Yugoslav firm, which is expected to be complete within two months.

Enjoying the warmth of Kuwait, President Tito looked fit as he drove through the capital's streets with Atiqi, head of the mission of honor assigned in accompany him during his stay.

In another development, Karim Sanjabi, leader of the opposition National Front, after talks with the 78-year-old

religious leader, said the two million persons who celebrated his homecoming Thursday showed a clear mandate for Khomeini to take over power.

Sanjabi, expected to be named to any revolutionary council, said if Bakhtiar believed in democracy he should immediately resign.

Government sources said despite the premier's latest peace move he, together with the army, had also made plans to immediately arrest any Iranian named to Khomeini's revolutionary council. That could be Saturday when Khomeini scheduled a news conference at 8 a.m. (0430 GMT).

While tens of thousands of crying followers received Khomeini's blessing at his dilapidated school building headquarters, thousands of other supporters marched through the streets in peaceful demonstrations shouting "death to Bakhtiar."

Several thousand foreigners and Iranians also crowded Mehrabad Airport trying to escape Iran before further expected violence. The airport had been closed Thursday during Khomeini's arrival.

Bakhtiar, in a radio interview, made the fresh peace offering to Khomeini in an effort to avoid a civil war which Western embassies said now faced the country.

He said he would take opposition members into his cabinet and open a dialogue with

Khomeini "if the conditions are favorable." Sensing total victory, Khomeini until now has scorned Bakhtiar's offers of talks.

The premier insisted the army was solidly behind his government though Khomeini aides said secret talks had been going on for some time with top army generals to try to pave the way for Khomeini's peaceful takeover of power and establishment of a "pure" Islamic state here.

However, diplomatic sources said Khomeini's camp appeared to have greatly overestimated its support within the armed forces which appeared to be still overwhelmingly behind the current civilian government.

In the interview Bakhtiar said he had finally agreed to Khomeini's return to Iran because he was "less dangerous" in the country than directing opposition from the outside.

Aides said the government could keep a closer eye on Khomeini in Iran and, if necessary, take action against him in the last extreme.

In Damascus

Negotiations open on railroad study

By a Staff Reporter

JEDDAH, Feb. 2 — Representatives of the Saudi, Jordanian and Syrian governments and three international engineering consortia Thursday opened meetings in Damascus to negotiate a feasibility study for the recommissioning of the historic Hejaz Railway.

Deputy Communications Ministers Dr. Nasser Salloum and Dr. Mohiuddin Kayyal are representing Saudi Arabia at the five-day session of a technical committee on the railroad, the Saudi Press Agency reported Friday.

The committee will negotiate the feasibility study with the three consortia designated from eight pre-qualified bidders by transport ministers of the three countries at a meeting in Riyadh in December.

One consultant will be selected to undertake the study which is to be completed within 13 months of contract signing in Amman at the end of this month, Jordanian Transport Minister Ali Suheimat said in a recent interview.

In the interview, Suheimat said that German and U.S. consortia were best placed to win the order to undertake the study. According to press reports, the three consortia negotiating in Damascus are TAMS of the United States with Canadian Pacific Railways; Louis Berger International and Deleuw Cather of the U.S. and RITES of India; and a German group led by Dorsch Consult.

Successful

The successful consultant will be contracted to study the technical and economic feasibility of relaying the entire 1,300 kilometers of the historic line in standard rather than the narrow gauge that once carried pilgrims and freight from Damascus to Medina. Opened at the turn of the century, the line operated fully only until 1914.

The Jordanian and Syrian sections still carry traffic but the Saudi section, damaged during World War One, was not brought back into service.

Depending on the consultants report, the target date for completion of the entire project is 1988, according to Suheimat. Meanwhile, in an interview published Thursday by "Al-Bilad" newspaper, Saudi Communications Minister Dr. Hussein Mansouri said that a feasibility study was under way for the expansion of east-west rail links in Saudi Arabia.

The Italian consultants Technital are conducting the study on the improvement of the Riyadh-Dammam line, built by Bechtel of the United States for King Abdul Aziz.

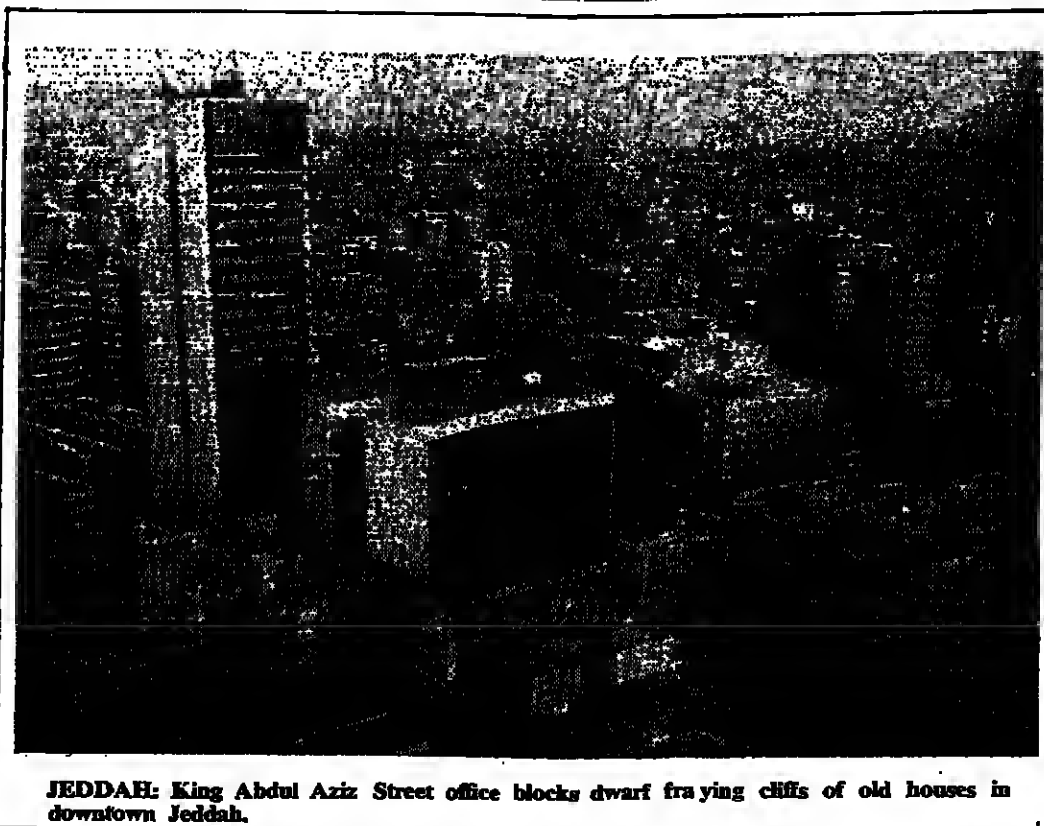

Depending on the study the ministry will consider an extension of the line to Jeddah and the Western Province, Dr. Mansouri said.

But Dr. Mansouri pointed out the emphasis now in Saudi Arabia was on road construction and the development of road transport.

In particular, the public transport company discussed at the most recent meeting of the Council of Ministers will not only operate inside Saudi towns but also between Jeddah-Riyadh, Mecca and Taif, Mecca and Taif and Baha and Jizan, he said.

A foreign company will be contracted to operate the network initially, he said, and work will begin on the project as soon as a Royal Decree is issued.

Turning to road construction, the minister said that 20,000 kilometers of road had been laid in Saudi Arabia with another 3-4,000 km. under construction.

JEDDAH: King Abdul Aziz Street office blocks dwarf fraying cliffs of old houses in downtown Jeddah.

This year and next

SR5b set for municipal schemes

RIYADH, Feb. 2 (SPA) — Belts of greenery to protect Saudi towns from wind and dust, and relocation of the entire port city of Jizan are some of the projects under study by the Ministry of Municipal and Rural Affairs, Dr. Muhammad Al-Hammad, the ministry's director general for planning and programs said here Friday.

Ministry lists preferred firms

RIYADH, Feb. 2 (SPA) — The Ministry of Industry and Electricity Thursday issued a list of national factories which must be given priority in government purchasing orders, under the Council of Ministers Decree 337.

The list covers 122 factories — 12 for food, five for animal feed, two for mineral water, ten for furniture and wood, two engineering firms, 12 for construction materials, seven for cloth, 18 for chemicals, 18 for paper, nine for prefabricated buildings, six for paints and 21 for metal goods.

Speaking of projects the ministry intends to carry out in the future, Dr. Hammad said that the ministry had signed an agreement with a Danish authority to study the planting of green belts around Saudi towns and the establishment of experimental nurseries to supply plants for parks and protective screens.

The creation of a new town for the people of Jizan is the subject of a SR25 million study, he said.

Hammad said that allocations for new projects in this year's budget now total SR1.3 billion. However, in the 1979-1980 budget the ministry is expected to receive an appropriation for new projects of SR3.8 billion — to make a total of SR5.1 billion for new projects between now and the end of the Second Five-Year plan.

Appropriations granted the ministry this year for priority new projects include SR150 million for the SR800 million Riyadh ring road; SR10 million for tunnels and bridges opposite the Ministry of Commerce in Riyadh; SR11 million

for study work on the transfer of diplomatic missions to the capital; SR80 million of a SR300 million corniche road in the Eastern Province; SR302 million for sewage projects in Mecca, Jeddah and Riyadh, SR87 million for similar projects in Qatif, Buraidah and Alsa, and SR135 million of a SR450 million swamp filling and drainage project in Qatif.

New local headquarters for the ministry in various towns and villages have received allocations of SR311 million this year, with the remaining SR615 million required for the projects held over until next year, he said.

At the same time, the ministry will now receive SR6.2 billion for recurrent payments on ongoing projects this year and next. The projects, which include an SR40 million data center for the ministry, an SR182 million development project for Saudi villages and the Jizan scheme, are expected to cost a total of SR13.7 billion. SR3.7 million has already been disbursed.

College stages and wins 1st marathon

DHAHRAN, Feb. 2 (SPA)

—The University of Petroleum and Minerals' first-ever marathon race was Friday won by UPM competitors in both team and individual placings.

A field of 89 runners from the university, Aramco and the Youth Welfare Presidency —which organizes national sport—lined up at the start of a 16-kilometer race Friday morning.

UPM's Peter Wednesday won the individual title and was followed home by Youth Welfare's Ahmad Al-Thaybani and Aramco's Eric Ower.

The team of Wednesday, Samir Hamdan and Jim Beeley won the team title in an average time of 55 minutes and 51 seconds. Aramco was second and Youth Welfare third and fourth.

Meanwhile, the university announced Friday that an exhibition of nearly 6,000 books will open on the campus Saturday.

The exhibition is the first of its kind ever staged by the university and will be open for one week.

Charity names 2 prize winners

RIYADH, Feb. 2 (SPA) — Journalist and scholar Dr. Abul Ala Al-Maudoudi was Wednesday night named winner of the King Faisal Prize for services to Islam.

Asir Governor Prince Khalid Al-Faisal chaired a three-day meeting of the selection committee for the prize, awarded by the King Faisal Foundation.

A second prize for Islamic Studies will be awarded to Dr. Fouad Sizin for his book "The History of the Arab Heritage".

Jizan terminal ready in August

JIZAN, Feb. 2 (SPA) — An SR 100 million terminal at Jizan Airport will be commissioned early in August, Asad Hamza Al-Najdi, director of the airport said Friday. The terminal comprises departure and arrival lounges a Saudi mail tenance depot, cargo facilities, a power plant, water pumping and electrical equipment, a meteorological and radio station, a rescue and fire station and an aircraft refuelling station, customs and a quarantine wing.

Riyadh farm talks set for March

RIYADH, Feb. 2 (SPA) — The second Arab conference on science and technology will begin here on March 31, to discuss the formation of an Arab company for livestock development, an Arab agency for food marketing and agricultural and food research.

Iraq interior chief due today

RIYADH, Feb. 2 (SPA) — Iraqi Interior Minister Ezzat Ibrahim, a member of the Baghdad Revolutionary Command Council, is expected here Saturday on a six-day visit at the invitation of Prince Naif.

Filipinos mount blockade to keep out refugee ships

MANILA, Feb. 2 (R) — The Philippines, faced with the possible arrival of several thousand more unwanted Vietnamese refugees, Friday threw a naval blockade across Manila Bay to stop them from entering the harbor.

The Coast Guard said the 30 kilometer wide blockade by Coast Guard cutters would remain as long as required.

At the same time a Coast Guard ship was sent to the southwestern island of Baco.

Vietnam reinforcements said entering Cambodia

BANGKOK, Feb. 2 (AP) — The forces of ex-Premier Pol Pot claimed Friday that Vietnam was sending reinforcements into Cambodia to dislodge its troops from recaptured areas near the capital of Phnom Penh.

The Voice of Democratic Cambodia, the only radio of the toppled regime, said that Wednesday and Thursday troops from Vietnam were sent in to retake the area around the Tonle Bassac River south of Phnom Penh and the southern Phnom Penh suburb of Takhmau, which the Pol Pot troops claim to control.

The broadcast claimed that the Vietnamese suffered 100 killed and five tanks destroyed in a "fierce battle" around Takhmau, 15 kilometers from

Phnom Penh. Thai sources said Thursday that elements of two to three divisions had been sent to reinforce the Vietnamese invasion force and possibly help mop up resistance around Phnom Penh, but it was not known where they were.

The broadcast also claimed the Pol Pot troops were now "masters of National Route number 7" which runs from the Vietnamese border to the key Mekong River town of Kompong Cham northeast of Phnom Penh and had hemmed in Vietnamese forces in Kratie, another Mekong town.

The provinces of Kompong Cham, Kratie and the Vietnamese border province of Svay Rieng were among the first places hit by Hanoi's divisions last year.

Officials said a vessel had slipped past naval patrols to reach the island. There were unconfirmed reports of a third vessel in the area.

The navy has been ordered to find them, ensure they have adequate supplies and warn them not to try to re-enter Philippine waters.

Werner Blatter, Manila's representative of the U.N. High Commissioner for Refugees, identified one of the vessels as the Cuu Long.

Military sources said the Cuu Long was driven away from the British protectorate of Brunei on Porneo Jan. 28.

Much of Palawan is mountainous and inhabited by primitive tribesmen, some of whom still live in stone age conditions.

The Philippines is trying to get rid of more than 2,000 refugees who have been aboard the Hong Kong-owned freighter Tung An in Manila Bay for five weeks, as well as more than 1,660 in a Manila refugee center who arrived last year.

A further 31 sneaked into Manila in a fishing boat Thursday. They are tied alongside the Tung An awaiting a presidential decision on whether they will be permitted to stay, despite a general order against allowing any more refugees to land.

The government has said it may have to send the Tung An to Hong Kong next week unless more Western countries agree to accept refugees.

ITALY: President Sandro Pertini (left) is expected to ask Giulio Andreotti, who resigned as prime minister Wednesday, to form another administration.

Nomination expected today

Andreotti may lead Italy again

ROME, Feb. 2 (R) — President Sandro Pertini is expected to give caretaker Premier Giulio Andreotti a fresh mandate to form a government after consulting party leaders on Italy's latest political crisis, presidential sources said Friday.

They said Andreotti, who resigned on Wednesday after losing the parliamentary support of the powerful Communist Party, would be given the mandate either late Friday night or early Saturday.

But political commentators

said Andreotti could face an almost impossible task if his minority Christian Democratic Party refused to accept the Communists as partners in a new government.

The Christian Democrats are officially committed to supporting Communist demands for a share of government, and the Communist Party newspaper "L'Unita" Friday accused them of leading the country into early elections.

"L'Unita" was commenting on a speech by Christian De-

mocratic parliamentary leader Giovanni Galloni, in which he said the Communist Party would have to undergo profound changes before it could be allowed into a government.

"It's the hardest reply the Christian Democrats have given so far, and prompts us to ask whether the party has already decided to go to the polls," "L'Unita" said.

General elections are not due until 1981, and all party leaders say they want to avoid them now.

Two British soldiers face murder charges in Northern Ireland

BELFAST, Feb. 2 (AP) — Two soldiers of the British army's elite Special Air Service (SAS) regiment are to be charged with the murder of a 16-year-old boy killed in an undercover stakeout last year, police disclosed Thursday night.

Detectives have flown from Belfast to the SAS' headquarters at Hereford near the Welsh border to escort the two unidentified troopers back to stand trial in Northern Ireland.

Authorities took action after Ian Paisley, a fiery Protestant militant member of parliament, threatened to raise the issue in the House of Commons.

The boy, John Boyle, was shot when he walked into an SAS ambush in a graveyard near the village of Dunloy last July. The soldiers had set up their ambush after the boy had reported finding a terrorist arms cache under a tombstone.

The day after reporting the weapons, the boy went back to the graveyard to see if they were still there. Army headquarters said the soldiers shot him when he aimed a rifle at them.

An autopsy later showed the boy was shot three times from behind. Police reported none of his fingerprints was found on the rifle.

The SAS, the army's cloak-and-dagger counter-insurgency special unit, has 120 men in Northern Ireland, mostly operating undercover.

And in London, it was announced that Special Branch

agents had arrested 36 men and women in Scotland and England in an unprecedented crackdown on suspected activists linked to Protestant terrorists in Northern Ireland.

Scotland Yard said the arrests were made in Glasgow, Aberdeen and Dumfries, Scotland and Coventry, England's Midlands over the previous four days.

Bilbao rioters protest Basque refugee arrests

BILBAO, Spain, Feb. 2 (R) — Riot police Thursday night fired rubber bullets and smoke bombs to disperse left-wing Basques demonstrating against a round-up by French police of Spanish Basque refugees.

Eyewitnesses in Bilbao and San Sebastian said several hundred demonstrators barricaded streets and stoned police vehicles.

Police sources in San Sebastian said 14 people were arrested. No injuries were reported.

Thursday night eight people, four of them policemen, were injured and 20 demonstrators arrested in similar clashes.

The demonstrators were protesting against a crackdown by French police last Tuesday on suspected members and sympathizers of the Basque terrorist group ETA living in southern France.

Another first from Pan Am. The only non-stop from Dhahran to New York.

Fly non-stop Dhahran to New York by Pan Am 747 SP. every Monday, Wednesday, Thursday and Saturday at 2359 hours.

From February 3, Pan Am fills the need for an urgent business air link with a choice of four direct flights a week.

Take off at one minute to midnight. Arrive New York 0545 local time next morning, well in time to catch your onward connection.

Relax enroute in the latest Pan Am 747 SP — the wide bodied, super performance jet designed with long distance travel in mind. First Class offers the unique comfort of reclining Sleeperette® seats.

Clipper® Class, our new upgraded Economy section, provides all kinds of extra new services.

Then, when you're ready, fly back in the same style and comfort.

Rhodesia farmers threaten strike halt if raids persist

JOHANNESBURG, Feb. 2 (AP)—Rhodesia farmers, prime targets of guerrilla attacks, said they may call a strike to protest the government's failure to protect them from the danger of attack, a warning was the strong from the Rhodesia National Farmers' Union, representing the 5,880 white farmers who produce for four-fifths of Rhodesia's \$720 million agricultural output.

The union said it had confidence of white farmers to stay under the rule — scheduled within a year — could be maintained with a marked decrease

in the war, an end of U.N. trade embargoes and a "significant degree of international recognition" for the new government, the RFNU said in a statement Thursday.

The new constitution, approved by white voters Tuesday, takes effect April 20 with an election for the first Rhodesian parliament with a black majority. Blacks will vote for the first time.

Warnings

The constitution reserves 28 of the 100 seats in the legislature for representatives of the country's 230,000 whites for 10 years, as a means of protecting

David Owen
Owen arrives for U.S. talks on crisis spots

WASHINGTON, Feb. 2 (AP)—British Foreign Secretary David Owen arrived Thursday night for talks with the United States on Rhodesia and other world trouble spots including Iran and the Gulf.

Owen and Secretary of State Cyrus Vance were expected to meet Friday afternoon and continue through Saturday. Friday morning they were due to fly with President Carter to New York for a memorial service for Nelson Rockefeller.

Diplomatic sources said the two officials will try to work out next steps in the stalled Anglo-American initiative to get a peaceful transition to black majority rule in Rhodesia.

Abandoned

More than 150 farmers and their wives and children have been slain in six years of guerrilla war. Fifteen farmers and members of their families have been killed in the past eight weeks.

Officials will give no precise figures, but it is estimated up to 4 million hectares, or a quarter of white-owned farmland, is now abandoned because of guerrilla attacks.

Rhodesia's agricultural viability has rested on a combination of white expertise and previous race laws that reserved most land outside tribal reservations for whites. Since the lifting of race laws 18 months ago, about 50 blacks have bought large holdings.

Man arrested in U.S. uranium extortion scheme

WILMINGTON, N.C., Feb. 2 (UPI)—Neither the FBI nor the General Electric Co. will discuss how a temporary employee was apparently able to walk out of the firm's nuclear fuel fabrication plant with 68 kg of low grade uranium.

The FBI Thursday accused David L. Dale, 39, with stealing the uranium and trying to ransom it back to the company for \$100,000.

Dale was jailed on extortion charges in lieu of \$150,000 bond. The uranium was discovered several hours after his arrest, sitting in an open field about eight km from the plant.

Police stations 20 die in bombings by El Salvador left

SAN SALVADOR, El Salvador, Feb. 2 (AP)—Bombs exploded at police installations in two cities in El Salvador Thursday, killing 20 people and injuring dozens of others, authorities said.

In a leaflet left at local radio and television stations, the leftist guerrilla Army of the People claimed responsibility for the blasts.

The leaflets said the bombings were in retaliation for the killing of a Catholic priest and four others by soldiers during a Jan. 20 shoot-out at a house in a working class district of the capital.

The government said the five were terrorists, but a spokesman for the Catholic Church said the five persons killed had been attending a catechism class.

The explosion at police headquarters in San Salvador killed 13 and wounded 30 others, a police officer, who declined to be identified, said. A second explosion at another police station in the capital wounded eight more.

Five military people and two civilians were killed by a third bomb blast at the National Guard post in San Miguel, 215 kilometers west of San Salvador. The National Guard is El Salvador's national police force.

"I saw several bodies in the rubble of the explosion. They were terribly mutilated. The place where I was there must have been some 15 mutilated bodies if I counted correctly," the police officer said.

He said the blasts had been caused by time bombs and said police had received a warning about the explosions at headquarters and managed to dismantle one time bomb, but he refused to give details. He said a second undetected bomb exploded, causing the widespread damage and casualties.

Vorster vows to continue apartheid

JOHANNESBURG, Feb. 2 (UPI)—President John Vorster opened a new parliamentary session in Cape Town Friday with a promise to continue with South Africa's apartheid policies, despite the rising tide of international criticism.

3 Croatians get 15-year sentence

ZAGREB, Yugoslavia, Feb. 2 (AP)—Three Croatian nationalists have been given maximum jail sentences of 15 years each for planting a time bomb during a visit to Zagreb by President Tito in 1975. The jail terms were handed out to Milos Tvrkko, Antun Cink and Josip Pemec at their retrial Thursday on charges of terrorism.

Albania's 'exiled' king leaves Spain

MADRID, Feb. 2 (AP)—The self-proclaimed king of Albania has left Spain on the advice of authorities who threatened to confiscate an arsenal of weapons found in his Madrid residence, Spanish officials reported Friday. They said that 39-year-old King Leka the First, who has lived in Spain since 1962, flew to Gabon on Wednesday with his wife.

Council of Europe acts on Nazis

STRASBOURG, Feb. 2 (AP)—The Council of Europe voted Friday to ask all 21 member countries to ratify a controversial measure allowing prosecution of war criminals no matter how long ago their crimes were committed. The measure was adopted in 1974 but no country has yet ratified it.

Austrian official mugged in France

STRASBOURG, France, Feb. 2 (AP)—Austrian Foreign Minister Wilibald Pahr was beaten up and robbed of his wallet and watch when he went for a stroll near his hotel here late Thursday night, police said Friday. Dr. Pahr, 48, who lost several teeth in the attack, managed to get back to his hotel and was immediately taken to hospital.

Smokers prone to heart attacks

BOSTON, Feb. 2 (AP)—Cigarette smokers face five times the risk of dying from heart disease compared with non-smokers, according to a study involving 4,000 middle-aged subjects. Reporting in the New England "Journal of Medicine," doctors in the Kaiser Permanent Medical Care Program in Oakland, Calif., said the 11-year study provided important evidence about the dangers of smoking.

Hearst goes into hiding after release from jail

FRANCISCO, Feb. 2 (AP)—Patricia Hearst, the heiress and the policeman she married, Bernard Shaw, was released from prison on the order of President Carter that there were no charges against her.

Shaw, 32, who was once Miss Hearst's bodyguard, said before Miss Hearst was released from prison on the order of President Carter that there were no charges against her.

After a brief stay at her mother's home here, where she wore a green shirt bearing the words "Pardon Me" Miss Hearst and Shaw put their suitcases in a car and drove off.

Defiant

Miss Hearst told reporters only they were taking a holiday at a secret location.

Asked if she could go anywhere without being recognized as Patricia Hearst, she replied defiantly, "I don't see anything wrong with being Patricia Hearst."

Why do Caterpillar Fork Lift-Trucks outsell all others in Saudi Arabia?

The reasons are good, and simple...

- QUALITY & RELIABILITY**—Caterpillar Lift-Trucks are expertly designed and only top grade materials and components are used in their manufacture.
- LONGER LIFE** Caterpillar Lift-Trucks can give up to three times more operational life than ordinary lift-trucks.
- PARTS & SERVICE** We know Saudi Arabia and the working conditions, we are the only company giving you a complete, real and honest back-up service. We have the specialised mechanics and the maintenance equipment to provide that service in our workshops or at your site. We have the parts too, the highest availability in the Kingdom.
- Our aim is to keep your Lift-Trucks working and minimise your downtime and delays.**
- VARIETY OF RANGE** Over forty different models for you to choose from—1 to 27 tons—diesel, petrol, LPG or electric powered—with cushion, or pneumatic tyres—there are hundreds of different attachments available for handling all kinds of material.
- OPERATOR TRAINING** We train your Lift-Truck Operator in the best use of your machine—the 'right' and 'wrong' about Lift-Truck operation and the day-to-day maintenance.

So many lift-truck users can't be wrong... why not give us a call today?

Khomeini's return

By Richard Wallis

TEHRAN — The slogan of the day at the headquarters of the man who intends to turn Iran into an Islamic republic is "now that the devil is gone, the angel has returned."

The "angel" is supposed to be Ayatollah Khomeini, who came back to a triumphal welcome by millions of his supporters here Thursday after spending 15 years in exile working for the monarch's downfall.

Embroidered banners spelling out this simplified vision of the world hang in every room of the former Islamic school in old Tehran which has been set aside for him by the supporters of Iran's spiritual leader.

Across the muddy-yellow brick facade of the unpretentious building, the slogan is repeated on a banner slung between two portraits of the 78-year-old Ayatollah, gaunt and angry and shaking a clenched fist.

The house could be a model on a tiny scale of what life under an "Islamic republic" might be like in Iran.

Swarming with turbaned Mullahs it has a certain chaotic efficiency in a country where so many enterprises seem complicated. But Khomeini has an unique advantage: he appears to be the only man who can get people to go back to work in a country which has been crippled from strikes.

From one classroom his supporters ran 50,000 marshals who tried to keep order during Thursday's triumphal procession along the 30-kilometer route from the airport to Tehran's main cemetery. Huge wildly excited crowds proved too much for them, but they served some purpose. There was not a single soldier or policeman along the route and not one shot was fired.

In another classroom, Khomeini's financial committee operates behind closed doors and in another, a small surgery has been set up. It is decorated with a typically Iranian love for gaudy flowers and the attendants assure visitors: "We have specialists for all diseases... Internal, children's all types."

The real center of attraction, however, is a huge hall in the basement which serve as a television room, prayer center and refectory.

The floor is covered by brightly colored carpets. While some pray others flock round the television set and the rest squat on the floor to eat kebabs and large slices of unleavened Persian bread. Soft drinks, tea and water are available, but imported soft drinks from Israel are boycotted, according to an aide.

Rice is cooked in giant cauldrons in the kitchen and about 400 people could sit down to eat together. All those entering the hall leave their shoes at the door as a sign of respect.

Those who work here, the poor sick, the aged, like one big family," a guide ex-

plained. A painted sign in the room reads "welcome our great leader."

The building itself is situated in a typical quarter of the bazaar — that tightly-knit rather conservative and devout community which provided so much of the organizational ability and business know-how that ensure Khomeini's success.

Outside the house, the neighbors gather to hear the evening news bulletin of the British Broadcasting Corporation's (BBC) Persian-language service relayed from loudspeakers to find out what the world thought of Khomeini's welcome that Iran's own television decided to ignore.

Khomeini spent his first night back in Iran at the house of relatives whose location has been kept secret for security reasons, according to aides.

One of the proudest men in the house Thursday night, however, was Rafiq Doust, a 38-year-old Tehran tradesman. It was he who drove Khomeini in his victory parade through Tehran.

"He just laughed and laughed and laughed at first when he saw how many people there were. He kept on saying he loved this people and felt part of them. Whenever I got nervous I hit a few people. Not many, but they were not seriously injured," Doust said.

Pandemonium broke out when the crowds stampeded through the security cordons to catch a glimpse of the leader for whose return they had so long been waiting. Khomeini eventually had to be flown out to his destination by helicopter and at one point had to board an ambulance to drive to a spot from where he could safely take off since at first attempt frozen supporters clung to the aircraft in clusters.

The pushing and shoving at one stage got so bad that Khomeini's black turban was knocked off. He was looking pale and faint.

When he finally spoke to the huge crowd at Tehran's Beheshti Zahra, his voice was rather feeble and undramatic, although the message that came across was revolution.

It was the voice of a man who spoke knowing he had time and that his audience would listen spellbound. The voice had an unmistakable lilt to it.

Many of those who flocked to Tehran for the first time in their life to see their Imam were disappointed, having been unable to distinguish him in the sea of black and white turbans.

The Ayatollah himself has said he does not want any personal power for himself in the new Iran, but some indication of the popular vision of him was given by an old peasant woman squatting on the floor beside me in a husky turning from the cemetery. She looked at the bus intensely and then said with a radiant smile but in a fairly low voice. "Imam is Shah." Nobody contradicted her. (R)

"WHAT DOES HE THINK WE ARE — SOME KIND OF FOREIGNERS WITH INITIATIVE AND KNOW-HOW?"

Korean reunification

By William Champion

TOKYO —

A North Korean proposal for talks this year with South Korea is being studied closely for signs that the Communist government is now willing to discuss reunification of the country, which has been divided in Cold-war fashion for 25 years.

A radio broadcast from the North Korean capital proposed a meeting of a "people's convention" representing the two countries this September and called for a cessation of all military hostilities.

The proposition is receiving unusual attention here and in Seoul because it was made only a few days after South Korean President Park Chung Hee proposed unification talks at any time and at any level.

The reaction was varied among analysts who specialize in Korean affairs. Japanese foreign ministry sources said the proposal seemed to reflect a new flexibility by the North and noted that in contrast to previous statements it contained several specific ideas for setting up the talks.

In Seoul, government officials reacted cautiously, saying only that they would study the radio broadcast for clues. Privately they were advising reporters that it contained nothing substantially new.

The broadcast was made in the name of the North Korean Committee for Peaceful Reunification of the Fatherland, an organization active since the 1940s and suspected by South Koreans of being merely a

propaganda outlet for President Kim Il Sung.

It proposed a "people's convention" to be held in either Pyongyang or Seoul; this September and a return to the principles of a 1972 communique in which both sides had agreed to discuss reunification.

It said the convention should be composed of representatives of political parties and social groups from both countries as well as Koreans now living overseas.

Such a meeting of non-governmental organizations in the past has been of little interest to South Korea, which has favored direct government-to-government negotiations.

However, analysts here noted that on Jan. 19 President Park of South Korea had called for reunification talks "at any level." They said the North Korean broadcast appeared to be a direct response to President Park's comments, which were made during a news conference in Seoul.

The major question, these analysts said, is whether the broadcast signifies a new willingness on North Korea's part to resume the long-stalled talks or is merely a routine counterproposal timed to refute the impression that President Park is more interested in negotiations than Kim Il Sung.

Japanese analysts here took the position that the broadcast was sufficiently different in tone and substance to merit serious attention.

"They are little more flexible than before," said one for-

eign ministry official. "but we should have to wait and see if this leads to serious business." He pointed out that the statement did not call for an immediate withdrawal of American troops from the South and did not declare unequivocally that President Park's government could not participate in the talks. Both of those demands had been staple items in previous North Korean statements.

He also noted that the broadcast did not insist that as a precondition to the discussions South Korea should repeal its strong anti-Communist law, something also insisted on before. Furthermore, the broadcast lacked the usual vituperative tone of most Pyongyang broadcasts, which usually refer to South Korean officials as "imperialist lackeys."

For years North Korea has insisted it would never deal with President Park's government and instead claimed it wanted to negotiate with the United States. The United States has refused to do so.

Some authorities have believed that the normalization of relations between the United States and China might lead to a thaw on the Korean peninsula. North Korea has drawn closer to China in recent months, supporting that country on key issues rather than backing the Soviet Union, causing some experts to believe China is now in a position to exert pressure on the North to ease tensions on the peninsula. Orderly anarchy

By Don A. Schanche

TEHRAN — The Iranian countryside, observed during a 14-hour journey by taxi across this country from the beautiful southern province capital of Shiraz to Tehran, appears to exist in a state of curiously orderly anarchy.

Army units that only a few weeks ago patrolled the streets of most towns and cities were nowhere in evidence along the 1,000-kilometer route that winds tortuously through mountain passes and across the high plateaus of eastern Iran.

The police, too, had withdrawn from both the highways and towns, either looking themselves in their headquarters or abandoning their posts in fear of renewed confrontations with crowds that had left evidence of fierce anti-government feeling even in the smallest villages.

Nowhere along the route was there the slightest sign of civil or military authority. Yet everywhere, people were calm who had run wild in the streets only two weeks ago when the Shah left the country. With what appeared to be no government at all, life seemed orderly.

The only sign of an attempt to substitute a new form of authority for the now-absent military and police was the presence in the major towns and cities of volunteer Islamic policemen. Mostly young men appointed by local religious leaders, they directed traffic and kept order among long lines of people waiting patiently to buy scarce kerosene for their stoves or gasoline for their cars.

But the marks of the wrath that some people had demonstrated in more than two months of conflict against the Shah and the government graphically illustrated how close to the surface the anger remained.

In Shiraz, for example, as in every major city in Iran, banks have been wrecked and stores selling hard liquor burned. A voluntary prohibition against alcohol has been declared and enforced by hotel and restaurant employees who once served thousands of Western tourists passing through the city to visit nearby Persepolis, the 2,500-year-old capital of ancient Persia that is now a ruin.

In every village, town and city, industrial plants and stores were shut tight — except those selling food, medicine and flowers bought to decorate the graves of those who died in the uprisings. Clusters of idle men, still on strike against the government in support of a call by the Ayatollah Khomeini for an Islamic republic, gathered on street corners.

In the central squares, parks of cities, the most powerful testimony of the feeling the people was evident.

Each place had once dominated by a massive or concrete statue of Shah or his late father, Shah the Great, the founder of Pahlavi Dynasty.

Not one was left along route from Shiraz to Tehran. Only the pedestals of these towering statues, blackened by the smoke of fires built when crowds the statues down in anger joy at the Shah's departure.

In place of the Shah's, or that of his father, of these blackened pedestals have been pasted over dozens of posters depicting a bearded face of a man. Pictures of the Ayatollah's decorated shop-dolls, office buildings, with all cars, trucks and buses even the mud walls of the farmhouses.

From the mood of the streets and from posters, it was obvious the main occupation in western Iran was one of expectation, waiting for Khomeini. Many that he would lead them to a spiritual era under a Islamic republic, gathered on street corners.

German foreign policy

By Karl Kaiser
 (The writer is director of the German Society for Foreign Affairs.)

BONN —

Under Chancellor Helmut Schmidt and his foreign minister (coalition partner), Hans-Dietrich Genscher, Bonn's foreign policy has entered a new phase — that of a re-emerged European great power. Schmidt's foreign policy is the first to fully combine two elements: on the one hand, the heritage created by his predecessors — a secure Western base established by Konrad Adenauer and the opened channels of Ostpolitik; and greater diplomatic freedom created by Willy Brandt — and, on the other hand, West Germany's new economic resources.

The resulting foreign policy encompasses four roles.

1. West Germany has the largest economy and is one of the leading powers of the European community. Given the Federal Republic's own dependence on the community, both the community's functioning and its members' prosperity are in West Germany's national interest; to this end, the Republic now fully uses its economic resources. Gone are the days when Bonn was obsessed with the costs rather than benefits of the community.

2. West Germany is the strategic outpost in the defense of Western Europe and major European actor in the Atlantic alliance. In this capacity, it has acquired the largest conventional force in Western Europe and become a major partner of America. No other Western European country is as immediately concerned with defense of Europe and willing to act accordingly.

3. The country has one of the leading economies in the Western world and on the international scene. West Germany's new position as one of the first trading nations, with its stable mark increasingly being used as a reserve currency, carries with it the responsibility of contributing to a sound management of the international economic and monetary system and to the debate on reforming rules and institutions, notably in connection with the North-South dialogue.

4. The nation is a bridge and force of mediation with Eastern Europe. Several factors that it cannot escape induce West Germany to seek mediation and détente with Eastern Europe: its geostrategic position in an area where East and West confront each other and where war would destroy the country, the exposed position of West Berlin, and solidarity with the East Germans and historical links with the small Eastern European countries.

But has the country, once described as an economic giant and political dwarf, now become a political giant as well? No. The Republic's new power status is heavily circumscribed: dependence on the four World War II allies on all questions concerning Berlin and the German problem; dependence on America for security and on the world economy for prosperity; dependence on continued détente with the Soviet Union to improve the position of West Berlin and relations with the East Germans and East Europeans.

If one adds the memories of the past to these factors, they provide powerful incentives for a sense of moderation and prudence in the use of West Germany's new resources. For the

same reasons, the dangerous new Rapallo — the German Soviet rapprochement of 1922 — that has been raised in ongoing European debate, Germany's new power base relegated to the realm of impossibility. Such a deal only occurred in the past when it was no adequate place for many in the West. That now exists in Western European councils.

As West Germany's influence grows, so do its dilemmas: the European community's nationalization of policy, the former Gaullist or British line would unleash of German nationalism and counterproductive for Bonn.

But the opposite course, two-community policy, immediately causes suspicion. West Germany wants to divide the community.

On the one hand, a law position in Ostpolitik is likely to threaten the achievement of détente with regard to Berlin, East Germany and Western Europe; on the other, an active, détente policy, fears of a new Rapallo or rapprochement of being vis-a-vis the Soviet Union.

It has been the particular tone of Germany and its role that each of the major powers of postwar Germany policy has produced a policy of reconciliation to East; Schmidt, whose still sense of Germany's limited responsibilities is guiding Federal Republic's role as a great power in a dependent world. (NY)

saudi press review

"The announcement that the U.S. Defense Secretary Harold Brown would visit Israel shortly indicates that the U.S. is reassessing its strategic options in the Middle East following the Iranian fiasco," according to "Okaz."

"This means that the U.S. will provide Israel with the latest weapons in its armory and in such large quantities that Israel would become a credible strategic partner of the United States. In turn, Israel, would take advantage of the American reassessment and its newly won military power to give vent to its aggressive instincts and to annex more Arab land under the umbrella of the new American protection."

"This renewed American dependence on Israel's partnership reflects some changes in the political spectrum of the region and an increasing Israeli intransigence over a peaceful settlement."

"This was made clear by Moshe Dayan's recent statement that Israel will never recognize the Palestinians nor their right to a homeland."

The paper said that the Arabs "must grasp the new political changes and reaffirm their ability and determination to realize their goals."

"Al-Medina" said "rarely does a man of the stature of Ayatollah Khomeini appear in a country and affect the course of events in it so profoundly, as this man has done in Iran. Now that he has returned home, it remains to be seen what his capabilities are after he has proved that his influence on the Iranians was greater than the impact of rockets, bombs and bullets. A few facts have been uncovered by the recent upheaval in the country," the paper said.

"One is that Iran was co-operating very closely with the Israelis and that the Bahai sect in the country was in-

strumental in bringing this about. The Bahai sect is a serious deviation from the true path of Islam," the paper said.

Because of the Bahais the majority of Muslims, the Shiites, suffered immeasurable discrimination. If the present changes will mean the supremacy of Islam, then the country will be able to achieve the stability and peace that the people deserve," the paper said.

"The next few days will reveal whether or not there were other forces behind Khomeini's movement as some have claimed, or whether Khomeini has the necessary cadres to establish his Islamic republic. Iran may be able to move forward again if the call for an Islamic government and system is translated from a mere slogan to a practical way of life."

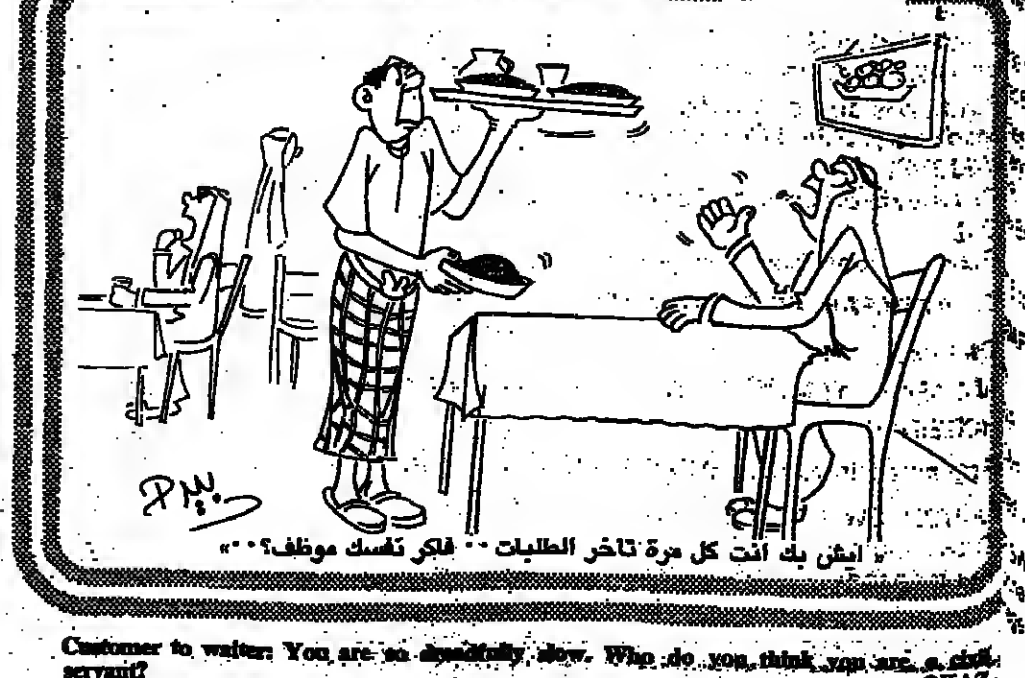

"The external dangers that threaten Iran, especially by the superpowers, should dwarf the

internal divisions that have racked it in recent times," according to "Al-Jezrah."

The paper said Iranian leaders "should guard against

such dangers that might plunge their country into a devastating civil war. The dangers in Iran are not going to be confined to the Iranian borders, due to the

strategic and economic importance of that country. Its are bound to influence course of events in the region."

Customer to waiter: You are so absolutely slow. Why do you think you are a good servant?

Documentaries: Feeney and the Arabs.

By Barry Reynolds
DHAHRAN—John Feeney's sense of timing is uncanny. If a film-maker personified the "right man-right place" adage it is he.

In 1974, for instance, he filmed the last minutes of the Egyptian temples, Ramses II and Abu Simbel, before they were shifted to higher ground near the Sudanese border.

"The temples," said Feeney, were built by Ramses the second for himself and his wife, Nefetari, 3,500 years ago. I took slaves 20 years to chisel them out of sheer rock face. After five years of literally slicing them into transportable pieces, an international consortium was going to move the temples — without fanfare. It seemed an inglorious last moment for such splendid monuments."

So Feeney provided the fanfare and preserved forever a pair of antiquities that some scholars believe the Greeks would have named the ancient world's eighth wonder, had the fate not been hurried under sand or centuries.

"It was definitely deadline footage," asserts Feeney. "The times were poised in mid-air, about to remove the top of one temple. I begged the driver to move the crane and a mild hunting match ensued, but he eventually lowered it out of camera range. Three minutes after 3,500 years of history was sitting on a crane."

Feeney was in Dhahran recently for the premiere of his latest project, a recruitment film for Aramco. Titled "The Enduring Resource," this 32-minute film — like all of Feeney's work — is an eye-feast. In trying to convince young Saudis of their future in the Kingdom's petroleum industry, "The Enduring Resource" weaves a tapestry of Saudi life itself. Mundane oil tanks are des-

cribed as "drums of black gold" and photographed with an artistry to match. Oil is energy but it also "flows through the world like sap through the branches of a tree."

The people photographed here are not actors but ordinary Saudis. Yet somehow Feeney makes these amateurs blind to the camera. The screen becomes a mirror framing contemporary Saudi life and a valuable historical document as well.

In 1964, Feeney and his film crew recorded another momentous event — the last great flooding of the Egyptian Nile before the Aswan Dam harnessed its mighty power.

This documentary film "Fountains of the Sun," charted the East African sources of the river whose origins had baffled geographers and historians for ages. Feeney traced the Nile's main sources from the East African lake plateau and followed the river's course through the paucity of its waters — using by the Blue Nile — to its end at the Mediterranean in Egypt.

"We were just in time," said Feeney with nonchalance befitting a routine dental checkup. "That year's flooding happened to be the worst in decades."

By the next year, first stage construction of the High Dam had reduced the Nile's annual rage to impotent sputtering.

Feeney's film, now property of the Egyptian government, was released in 1969, premiered at London's Princess Anne Theater and subsequently played to full houses in Egypt and throughout the Arab world. United Artists offered Feeney \$125,000 for distribution and television rights but the Egyptians remain sole custodians.

The Canadian director has so lost interest in striking titles. As a film title for the Egyptian temples, "The Eighth Wonder"

Director John Feeney with an admirer

aptly reflects an insight into what might have been. "The Enduring Resource" seems initially just a title metaphor for oil. Midway through the film, however, the viewer realizes that it is people, with their inexhaustible energy and ingenuity, who Aramco feels to be Saudi Arabia's real resource. And in "Kuwait, Kuwait," a 1974 Feeney film made for that country's government, the title impishly reflects — then deflates — the oft held notion that real Kuwaiti life exists only in its capital city.

The documentary nature of most of Feeney's films has made him exactly a household name in the West. Now based in Cairo — having come there in 1964 from the Canadian National Film Board (NFB) — he has, however, attracted a wide following throughout the Arab world. "I don't believe that one can fly

into a country and just make a documentary film," he says. "You must acquire a feel for the whole fabric of a culture — its language, sights and smells. This is especially so for a filmmaker," he added.

Like most NFB artists, Feeney prefers to make the fabric himself. Usually he writes, directs and films his own work, ensuring himself the kind of complete artistic control that few Hollywood directors can command.

Feeney's next project, "I'd rather not say," he mutters. "Idle talk's ruined many a future project of mine. I find that when I keep my cards close, the future is at least in my own hands."

Emigration restrictions relaxed by the Chinese

HONG KONG, — Peking has suddenly and significantly relaxed its emigration restrictions, bringing an unprecedented jump in the numbers of Chinese residents moving to the United States and greatly improving China's chances of trade concessions from Washington.

U.S. consular officials here said that certified Chinese immigration applications, which numbered only about 25 to 30 a month one year ago, would probably exceed 2,000 for January and gave no sign of slackening. "I just don't know what the potential is," said a consulate official, who has requested more staff to handle the sudden deluge. "There are a lot of people in China." — (WP)

Arab films open in Washington

By a Staff Reporter
Washington Bureau

WASHINGTON — An Arabic Film Festival, which includes the controversial Egyptian movie "Al-Asfour" ("The Sparrow"), opened at a local theater here late last month.

The festival, sponsored by Georgetown University's Center for Contemporary Arab Studies, features four well-known Egyptian films, two movies from Kuwait and one from Algeria.

The 35mm commercial productions will be screened with

the original Arabic soundtracks and English subtitles.

The films, to be shown at one-week intervals that began Jan. 27, include:

- "Al-Bustagi" (The Postman), Egypt
- "Bab al-Hadid" (Cairo Station), Egypt
- "Al-Asfour" (The Sparrow), Egypt
- "Al-Ard" (The Land), Egypt
- "The Crude Sea," Kuwait
- "Chronique des Années de Braise" (tentative), Algeria
- "The Wedding of Zein" (tentative), Kuwait

The screenings at Washington's Georgetown Theater were arranged with the help of the embassies of Egypt, Kuwait and Algeria.

"Al-Asfour," a critically acclaimed film by Egyptian director Youssef Shaboun, deals with the Arab defeat in the 1967 Middle East war. The movie attacks the policy of the Nasser regime, and its screenings in Beirut and other Arab capitals were bitterly opposed by supporters of the late Egyptian president.

Americans on a gas-guzzler spree

By Angus Phillips
Washington Bureau

WASHINGTON — OPEC has announced the price of oil will be up 14.5 per cent before the year ends. Car manufacturers are building smaller and lighter.

In the U.S. Department of Energy lies the nation's emergency standby gasoline rationing program, shrouded in dread and fear.

And what is America buying?

Not tents and not backpacks. Americans aren't going wild over bowling balls or tennis rackets. They aren't burning up their paychecks on jogging shoes and they aren't standing in line to buy sailboats.

America is buying RVs. That's Recreational Vehicles, sports fans, the highway gas guzzlers that carry campers to a rustic destination, then couch them in nylon-pile luxury for the duration of the stay.

RVs are supposed to be dead. Five years ago the bottom fell out of the industry with the oil-producing countries cutting off the tap. Recreational vehicle production dropped from 528,800 units that year to less than 300,000 in 1974.

Winnipeg, whose name was almost synonymous with motor home, had to close its factory.

Good riddance, said a lot of outdoors people who had pitched their tents in some leafy glade, only to wake up next morning to the clatter of an RV generator and the chatter of the TV on the pad next door.

The hiatus didn't last. RVs are back where they left off, with production of 526,360 last year.

That year, Americans spent about \$16 billion on recreational pursuits, including everything from boats and fishing rods to basketballs, bicycles, golf clubs, scuba tanks, backpacks and tents.

According to the National Sporting Goods Association, which keeps tabs, more than \$4 billion, one-quarter of that amount, was spent on RVs. "It's the highest single chunk of recreational money spent on any one category," by far," said Robert Goodwin, NSGA's assistant executive director.

At the 14th annual RV show here recently, the people paid \$3.75 apiece to hear the sales pitches and stroll through exhibit after exhibit of shaggy, shaggy, shaggy, portapottied homes away from home.

Who, motivates modern American man to covet a cumbersome vehicle that is unlikely to get more than 6 or 8 miles to a gallon of gasoline in these troubled times?

Louis Mitchell, an RV salesman, says big motor homes are "for people who don't know what to do with their money. You look around my neighborhood and you see them sitting there. People can't afford to drive them."

"I think the man, when he looks at it, he wants to drive

it — like a fire truck. It's big and powerful. He wants a toy you know. You went through it, too."

It behooves Mitchell to be blunt because he sells truck campers and trailers, which compete directly with the big motor homes.

Impartial observers are more evenhanded. Anderson Flies, who publishes an annual camping guide from his home in Metairie, La., thinks RVs can provide real savings to families on vacation.

"Take a family of six and try to stay at motels and eat in restaurants for a vacation and see what you get," he said. "The same family can spend \$15,000 on a mini-motor-home and stay in campgrounds for \$5 or \$8 a night. They'll save money and get more enjoyment out of it."

Flies recognizes that the 11-meter, four-ton monster RVs can't last forever. "Americans traditionally have felt that if you don't like it here, put on wheels and move it down the highway. But that's going to have to change."

Flies and others have found a happy compromise in mini-motor homes built on the chassis of a van, but expanded to sleep five or six in modest luxury.

Flies has a mini and he claims he can use it as a second car when he isn't camping and that it gets up to 13 miles per gallon of gas on the highway. — (WP)

PORTS AUTHORITY PUBLIC NOTICE

Following vessels abandoned by owners and lying in Jeddah Ports will be sold on terms and conditions stipulated hereunder by Jeddah Port Management:—

Vessel:

a. TAZ (EX TOM GERMA 57)

Owners ADDAFAR YEMANITE NAVIGATION COMPANY Registered in PANAMA. Built 1955 at OTTEN SENNER EISENWERK HAMBURG —

Gross tonnage : 935 Length : 65.99 m
Net tonnage : 558 Breadth : 9.94 m
Dead Weight : 1466 Draught : 4.66 m

2 Decks motor ship General Cargo. 2 Hatches (14.0 — 13.4 x 5.6) Machinery: 4 SA 8 Cylinder 32 C x 450 mm 746 KW (1000 BHP).

Net tonnage : 157 Breadth : 8.74 m
Dead Weight : 573 Draught : 3.169 m

Open shelter deck motor ship General Cargo —

Reefer.

1 Hold 30.1 m Grain 1256 Cu.m., Bales 1137 Cu.m.

Insulated 62 Cu.m. — 2 Hatches (each 10.4 x 5.1m)

4 winches derrick 1 (3 to 5 tons) 2 (3 tons)

Machinery: 2 SA 6 Cylinder 267 x 343 mm 440 KW (590 BHP)

Crossley Brothers Ltd., Generator 1 x 23 KW 230 V D.C.

Fuel 17.5 tons Diesel Oil — 10 Kts.

c. ADDAFAR (EX FESTINA 55)

Owners: ADDAFAR YEMANITE NAVIGATION COMPANY

HODEIDAH

Registered in YEMEN ARAB REPUBLIC — Built 1955

SCHIEP SW A.A. POL — WIRDUM —

Gross tonnage : 399 Length : 47.48 m

Net tonnage : 235 Breadth : 7.22 m

Draught : 3.46 m

Motor vessel general cargo. 2 Hatches (9.8-10.5x4.4) ER
Derricks 2 — (2 tons).
Machinery: Oil 4 SA 6 Cylinder 290 x 420 mm — 291 KW (390 BHP) Masch. KIEL A.G. — 11 Knots.

LOCATION

The vessels are lying at anchor at Jeddah Sea Port and can be inspected by interested parties after obtaining permission from Jeddah Port Management.

TERMS AND CONDITIONS

a. All bids must be sent in sealed envelop addressed to the Director General Islamic Jeddah Seaport, within TWENTY DAYS of publication of this notice.

b. The bids must be accompanied by a bank draft or cheque payable to Director General Islamic Jeddah Seaport (on demand) of an amount of Saudi Riyals 35,000/- (Saudi Riyals Thirty Five thousand) for each vessel. This amount will be refunded to those whose offers are not accepted.

c. The sale is on as is where is basis.

d. Successful bidder will remove all the vessels from Port premises at their risk and costs within twenty days of being notified about acceptance of their bid and after payment of the amount of bid to Jeddah Port Management.

e. If the successful bidder fails to pay all costs and remove the vessels within twenty days of notification mentioned above he will forfeit his security deposit and lose all claims and rights.

f. Jeddah Port Management reserves its right to accept or reject any or all offers.

g. Bids shall be submitted for every individual vessel separately.

The U.S. builds up its nuclear arsenal

By Walter Pincus
WASHINGTON — Set back from Route 60 by a green field of winter wheat in the flat Texas panhandle country, 38 kilometers northeast of Amarillo, is the aging 10,000-acre World War II Pantex ordnance plant.

It looks like the beef processing and packing plant on the same highway except for one detail — Pantex areas are surrounded by double chain-link fences and modern guard towers.

Pantex clearly packs a different kind of product. In the middle of nowhere, it is the final assembly point for all U.S. nuclear weapons.

Over the next several months, specially constructed, unmarked, armored tractor-trailers, guarded by one or more armed escort vehicles, will arrive at Pantex in increasing numbers from various parts of the country. Their cargo: Nuclear and other special parts that will mark the beginning of the most ambitious U.S. nuclear weapons-building program in 20 years.

The program comes at a time when the United States and the Soviet Union are engaged in the final negotiations on a strategic arms limitation treaty, which is a major goal of the leaders in both countries.

Over the next five years, the U.S. nuclear stockpile is to receive new Minuteman III land and sea-based intercontinental missiles; a new cruise missile; a new Lance warhead; new strategic and tactical bombs, and a whole family of atomic artillery shells.

The new weapons are more powerful and effective and, according to scientists who worked on them, safer from accidental explosion than those they will replace.

A government scientist said recently that "a nuclear weapon these days is like a complex pinball machine."

There are, for example, over 2,000 separate parts in the new Trident I submarine-launched ballistic missile warhead. Some 125 separate components will come together at Pantex when the Trident I production gets under way this year.

The process by which the United States develops, tests and approves production of nuclear weapons such as the Trident I is as unknown to the public as the Pantex facility and the rest of the multi-billion-dollar nuclear weapons complex. It is a network of government-owned laboratories, testing facilities and manufacturing plants, located, for security reasons, unobtrusively from California to Florida.

Starting with the World War II Manhattan Project, which led to the first atomic bomb, secrecy has been the hallmark of the U.S. nuclear weapons program.

That secrecy has relaxed

somewhat in recent years. But what the public has learned primarily is about numbers — the number of weapons, the total yield or the power of each device. These types of numbers baffle, but seem to satisfy the public and keep people away from the realities of the nuclear weapons-building process.

The result has been that real knowledge and decision-making in the nuclear weapons field has been held by a relatively small group of government technocrats and scientists, civilian and military.

By law, the president each year must review and approve nuclear weapons tests as well as the production, deployment and retirement of all weapons. This "stockpile" paper that he reviews usually arrives in November or December of each year.

The stockpile paper is normally drawn up by the Department of Energy — which builds nuclear weapons — in consultation with the Defense Department, the consumer of the weapons.

As consumer, the Pentagon must decide what type of weapons it wants. As in the civilian marketplace, however, the consumer is limited by what is offered. In the case of nuclear weapons, the nation's two nuclear weapons laboratories at Los Alamos, New Mexico and Livermore, California, often determine characteristics for a weapon because of what they have designed before-hand.

Personnel, too, overlap in the nuclear weapons field, with a small number of technocrats and military men shuffling from post to post.

The Energy Department's past chief of national security operations was an Air Force general.

His replacement, the current Energy Department Assistant Secretary in charge of weapons, is the former deputy director of the Livermore Weapons Laboratory. His chief deputy at the Energy Department worked at Los Alamos. The Energy Department deputy in charge of military applications is an Army general.

Over at the Pentagon, the man who runs the Military Liaison Committee (MLC), which coordinates between the Defense Department and the Energy Department, is a former Livermore man. And, for the first time, the Secretary of Defense, Harold Brown, is himself a former Livermore director.

Although the group that runs the nuclear complex is narrow, the system that leads to a decision to produce a new warhead seems rational and secure — at least on paper.

But interviews over the past few months with those who have participated in the process — current and former go-

vernment officials, military men and scientists, members of Congress — disclose a somewhat different story.

The process, according to many, has been mindless at times, grinding out new weapons to replace old without critical analysis of how they eventually could be used.

Nuclear artillery is a case in point. The first nuclear shells were built in the early 1950s when the United States was concerned about a European war. All weapons were made with dual-capability for nuclear and conventional warheads.

Twenty years later, the limits of nuclear artillery in range and use are well-known. Yet a new generation is about to be produced without a close look at whether they are in fact needed.

Inter-service rivalries also have affected nuclear weapons decisions. The Army's desire to get into the nuclear picture, for example, was as much behind the push for nuclear artillery as any other factor.

In recent years, competition between Los Alamos and Livermore has been a growing influence on the weapons program as they try to outbid each other to produce a warhead.

Enhanced radiation effects from nuclear weapons, the basis for neutron warheads, is a Livermore product. Enhanced radiation was promoted as the basis for a new 8-inch nuclear artillery shell when Congress in 1973 turned down funding Los Alamos' traditional nuclear shell.

Today, the two laboratories are working on competitive medium-range missiles for Europe and each may have a special-warhead effect as a sales point.

The bureaucratic framework for the competition is the Energy Department's seven-phase development and production system for nuclear weapons. The complicated route from conception to production normally takes from five to 10 years. Stockpile life for a completed warhead is supposed to be 15 to 20 years.

Phase one is weapon conception, where the two nuclear laboratories explore on paper the ideas that could be translated into deliverable systems.

In some phase one studies, the Los Alamos and Livermore labs coordinate with the Sandia Corp., which designs electronic systems. These miniaturized systems inside the weapon guide it to the target, prepare it for firing, and then actually set it off.

Phase two involves more study, often using computers.

The Los Alamos and Livermore weapons labs have two of the most advanced computer complexes in the country.

They use the computers to analyze through mathematical models exactly how the nuclear elements in the proposed weapon would work and whether the outcome is what the military services need.

Scientists at both weapons labs insist these computer exercises are the single most important tool in the development process. Without the mathematical projection, there would be no way, short of exploding hundreds of test devices, to determine the size and shape of new weapons.

It is also in this phase that some devices are tested underground in Nevada to check out that the computers have shown to be the most promising designs. Both labs have an allocated number of such tests — seven to 12 in recent years, which can cost \$1 million or more a test.

The number of development tests allowed by the president has decreased in past years. With the possibility of a comprehensive test ban looming for the future, both labs have been pressing to increase this number.

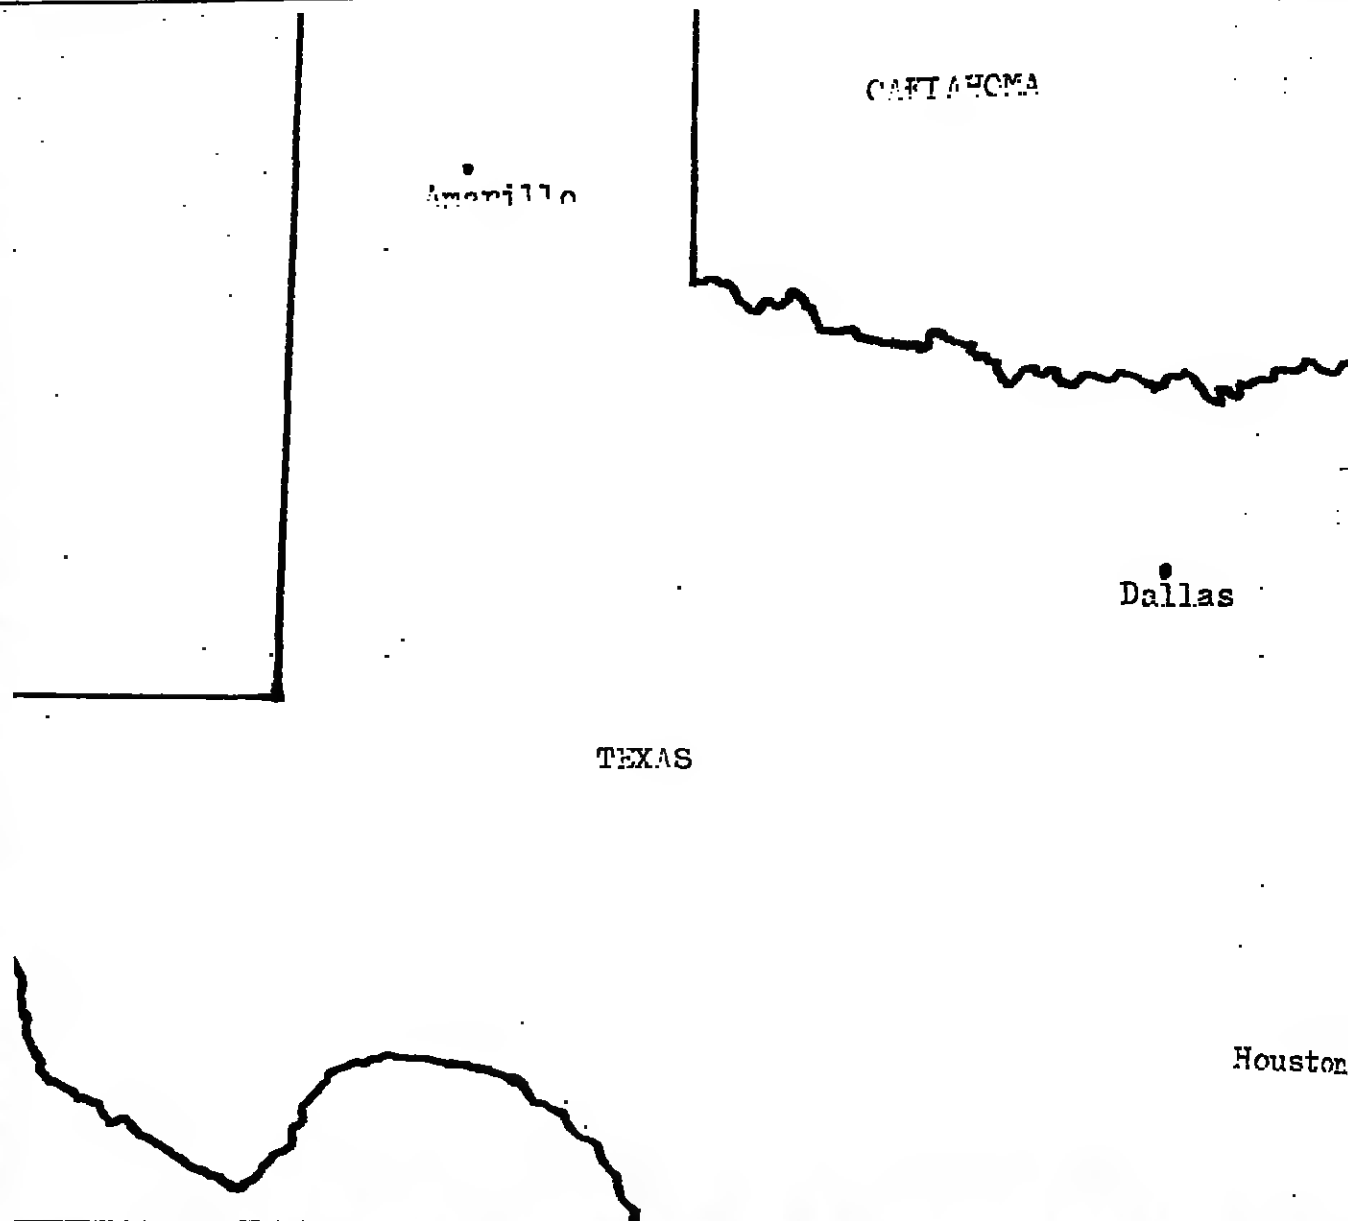

Phase two has one other important element. The military services by then have shown an interest in the type of weapon under study. The prospect exists of a warhead emerging that will go on to production. Both labs compete with separate designs — a competition that ends with one or the other being selected by the Energy Department to develop the weapon if it is chosen for production.

These first two phases can run three years or more. Many weapons studies never proceed beyond phase two. Currently, for example, the Navy has made a request for a phase two study of a nuclear anti-submarine warfare weapon. Los Alamos won the job, says a source, "but we doubt it will ever go anywhere."

Phase three is the jump to commissioning the large amounts of funds necessary to build a weapon.

The Pentagon must request a phase three study. Energy officials then decide whether Livermore's or Los Alamos' design will be used. This decides where engineering and subsequent development will take place.

It is normally during phase three that Congress, through

THE TEXAS PANHANDLE: Site of the U.S. nuclear weapons final assembly plant.

budget submissions, gets its first indication that a specific new weapon is being contemplated.

It is also during phase three that the first sign of the costly, intricate and time-consuming effort that goes into manufacturing each weapon emerges; for example, the Energy Department's Albuquerque operations office, which coordinates the production process, produces a three-volume plan assigning production of warhead parts to different Energy Department plants.

Thus, during phase three, the first orders will be placed for the special machine tools to build the unique parts that each weapon needs. The lab designing the weapon sends out specifications, and each plant in the complex works out a

production system. Although the labs can fabricate one prototype of the weapons, other plants in the complex have to make their particular specialty for the eventual production run.

Frequently not only are new machine tools needed to build the parts designed for a specific weapon, but also a machine must be built to test the new part to ensure it meets specifications.

Some of these pieces of equipment are so complex they must be ordered more than three years before production is scheduled to begin.

Late in phase three, the proposed warhead finally is priced, not just in terms of nuclear and other production materials, but also in terms of

machinery and actual construction needed to meet its unique requirements.

Those additional costs are often substantial. For example, an extra \$22 million was programmed for construction associated with the proposed neutron 8-inch artillery shell.

Phase three can take two to three years or more to complete.

Phase four — final production engineering — lasts another three years. During this time a work force to build a weapon is security-cleared and trained.

Working models of the warhead are built. Tests of parts are made constantly — pushing the material until it is destroyed to see how long it lasts.

Hundreds of changes are as a result of these tests. The labs that designed the weapon working with the production personnel.

Working out the final production during phase four can take another two years or more.

Pilot production begins phase five, with the parts going to the Pantex plant at Amarillo for assembly. Again, completed weapons then torn apart to see how various parts interacted.

Nuclear weapons are up of materials that are compatible. The high explosive component often chemically unites while the metallic materials are constantly giving radiation. — (WF)

Japan's Bunraku puppet theater

By F.W. Rawding

In Osaka, one of the most bustling cities of modern Japan, down a little street that you would miss if you tried to find it without a guide, is the Bunraku Puppet Theater. Osaka is the only place left nowadays where this ancient art form is perfectly performed.

It evolved in a most interesting way from the streets and market places where blind story tellers gathered crowds a thousand years ago. At first, the story tellers, who chanted their tales, accompanied themselves by tapping a bamboo fan on their walking sticks. When later the *Samisen* was invented, the story teller would hire a player of this haunting, three-stringed instrument to keep him company. Eventually, about three and a half centuries ago, the puppets were introduced.

Originally, the puppeteers were all Koreans. The Koreans had already brought Buddhism to Japan many centuries before, and Korean craftsmen had built the massive wooden temples which stand to this day in Nara, Japan's first capital. The modern Bunraku performers are the *Joruri* singers, who intone the story like a Greek Chorus; the *Samisen* player who accompanies them; and the three manipulators of each puppet. The puppets are half-sized with intricately jointed limbs and exquisite costumes. The heads are made in such a way that the eyes, eyebrows, lips and even ears move realistically. The master performers control the heads and their apprentice assistants work the arms and legs. The puppeteers work from a trench cut out of the small stage and the singers and accompanist sit at the back against a simple stage set of pine trees or a painted screen to suggest where the

action takes place. The puppeteers, wearing black enveloping robes and cowls to cover their heads, manipulate the puppets from behind. The magic and skill is such that, after a few moments, they seem to disappear and the puppets come to life and move by themselves.

The plays are all traditional and date from the Heroic Period, the time of the Samurai warriors in the middle ages. The subjects are powerful and dramatic; honor, loyalty, betrayal, passion, self-sacrifice and murder. Some of the great poets and dramatists of Japan's Golden Age wrote for the Bunraku, so it is an essence of the best of the national literature.

The most famous puppeteer of recent times was *Toyotake*, a renowned *Joruri* singer, was still attracting the cognoscenti to his performances from all over Japan when he was 75. There is an enormous repertoire of plays and performances, usually of six associated stories, last about four hours. The feat of memory, for both puppeteers and singers, is incredible. Audiences always take their lunch boxes and the little theater is invariably crowded.

Bunraku is now almost an esoteric art form and like *Noh*, the ancient mask drama, is cultivated by only the most traditionally cultured Japanese. However, Bunraku gave birth to *Kabuki*, the popular traditional theater of Japan, which still follows closely the style and content of Bunraku in costume, music and story. The older *Kabuki* actors learned their profession from watching and studying the Bunraku.

Much of the modern Japanese cinema, too, echoes the themes of Bunraku and *Kabuki*.

BUNRAKU: A sketch of the traditional samurai used in the Japanese puppet dramas.

Desai pays a friendly visit to India's southern neighbor

By Clarence Fernando

COLOMBO — Indian Prime Minister Morarji Desai arrives here Saturday on a three-day official visit that Sri Lanka hopes will further boost the good relations between the two neighbors.

The 33-year-old Desai comes at the invitation of Sri Lankan President Junius Jayewardene, an old friend.

Briefing members of parliament on the Indian leader's visit, Jayewardene said last week the Indian Prime Minister was "respected the world over as a true democrat who had worked hard to keep the

flame of democracy alive in Asia."

Jayewardene will be at the airport to receive Desai, who is making his first visit to Sri Lanka since he was elected prime minister 22 months ago.

Foreign ministry sources said there will be no official talks between the two leaders, only informal exchanges of views on non-alignment, world issues and bilateral relations.

"The two countries have no problems whatsoever. No boundary disputes or problems of people of India descent," an official spokesman said.

Under agreements signed between the two countries in 1964 and 1975, about 600,000 people of Indian origin are to be repatriated and 375,000 more given Sri Lankan citizenship over a 15-year period.

Talks between Desai, Jayewardene, and other Sri Lankan leaders (including Prime Minister Rana Sighe Premadasa) are expected to explore the possibilities of expanding trade and economic cooperation between the two countries.

The balance of trade at the moment is heavily in India's favor. Sri Lanka hopes to be able to overcome this in part by encouraging Indian indus-

trialists to set up factories in the free trade zone near Colombo to manufacture items for export back to India.

Among the major projects already approved is a leather goods factory which will be set up by an Indian firm with an investment of 500 million rupees (about \$32 million).

The two countries are also eager to jointly market tea and set up joint ventures in plantation industries, cement, pharmaceuticals, graphite, aluminum and rubber-based industries in Sri Lanka.

Prime Minister Desai will be the chief guest at Sri Lanka's

Independence day celebrations on Sunday at Kandy, the former hill capital, 115 km from Colombo.

The day also marks the first anniversary of the installation of Jayewardene as the country's first executive president under a new style presidential system.

The Sri Lankan president has announced he will invite Desai to lay the foundation stone for a dam to be built across the Kotmale river in the central hill country as part of the World Bank-aided Mahaveli River basin project. —(R)

Code-breaker documents declassified

By Randolph Schmidt

WASHINGTON — Even as allied troops stormed ashore at Normandy on D-Day in 1944, Japan's ambassador in Berlin was advising Tokyo that the invasion of Europe would not take place for some time, according to documents made public here Thursday.

The U.S. National Archives released more than 4,000 pages of previously secret material — nearly all from the "Magic" and "Ultra" projects under which allied experts broke the top secret Japanese and German codes during World War II.

Papers dealing with intercepted Japanese radio traffic indicate that German dictator Adolf Hitler had told the Japanese the allied invasion of Europe

— while anticipated — was some time off. They add that Hitler planned a strategy of a mobile defense against the U.S. and British forces in Italy, to kill as many allied soldiers as possible there, and waited to launch another invasion of the Soviet Union.

The next day, June 7, 1944, however, the tone of the messages from the Japanese envoy in Berlin to Tokyo changed substantially. They reported the allied shelling of Normandy and paratroopers landing in France.

The documents made public contain some large gaps, the result of their having been censored by the U.S. National Security Agency.

Archives officials said the deletions were not explained to them, but they speculated that some of the material may

deal with individual privacy. Also information on the Ultra program is released only with the agreement of officials in Britain, where some aspects of the project are still considered secret.

One set of Japanese diplomatic messages reveals discussions with the Soviet Union seeking a non-aggression pact between the two nations. The Russians offered such a treaty in exchange for the southern part of Sakhalin Island, held by both nations at the time. Or, they said, they would offer a neutrality agreement if the Japanese would merely drop claims to the Russians' northern part of the island.

As it turned out, Russia declared war on Japan near the end of the conflict, and now occupies all of Sakhalin. (AP)

Getty GETTY OIL COMPANY

Getty Oil Company announces a vacancy for one Attorney in Mina Saud, Partitioned Neutral Zone, Kuwait.

Title of Position : "ATTORNEY"

Required Qualifications :

Must have a Law Degree from a recognized University with three years experience in legal practice with a reputable firm. Must be fluent in both Arabic and English.

Basic Duties :

Serves as legal advisor to the Company's management, represents the Company on legal matters and provides a variety of legal services for the Company's operations in Saudi Arabia and Kuwait.

Salary :

Because of the nature of this position the salary will depend upon the qualifications of the candidate. In addition, the Company grants benefits including child allowance, housing, medical treatment, savings plan and educational assistance for eligible dependent children according to Company policy.

Applications should be submitted within two weeks to:

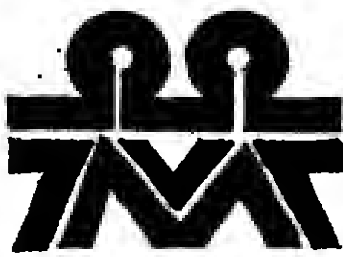

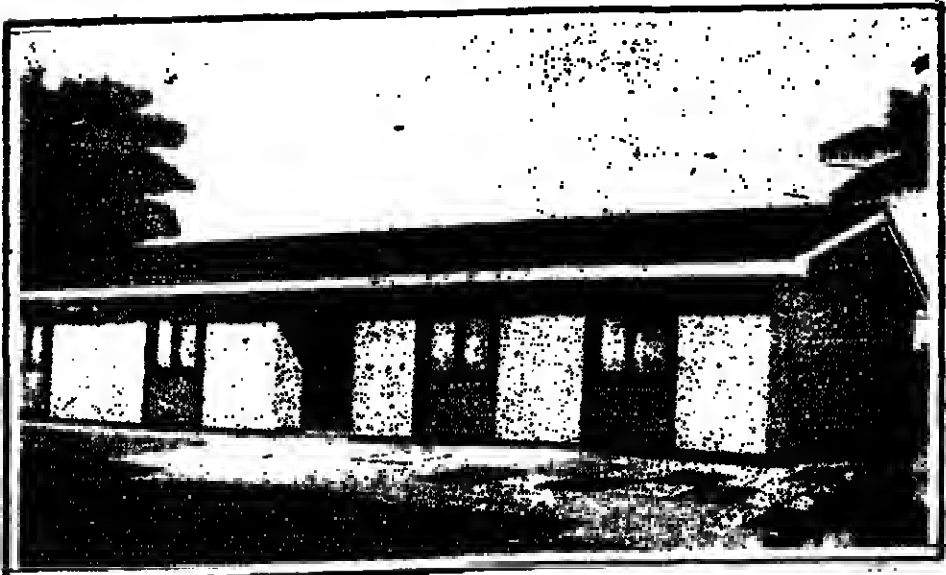

Employee Affairs Manager

Australia crumples to 205-run Test defeat

MCC wins Ashes series

ADELAIDE, Feb. 2 (Agencies)—Australia went down to a 205-run defeat here Thursday on the final day of the fifth Test against England.

With the defeat, Australia lost much of its chance of salvaging some honor from a painful Ashes series. England has now won the series, four Tests to one and will retain the Ashes.

England had set the Australians 366 runs to win in its last innings Wednesday afternoon. Australia had 495 minutes including 15 overs in the last hour to achieve the target—difficult but not impossible on a placid batsmen's wicket.

Weak

In the event Australia's weak batting order failed to hold off the England attack and the side was bundled out for 160 runs in a mere 67 overs.

Mighty efforts by captain Graham Yallop to stiffen the resistance merely underpinned the lack of any strength in the Australian offense and

ENGLAND INNINGS: Bob Taylor of England is Wednesday dismissed for a Test high of 97 runs caught by wicket-keeper Kevin Wright (extreme right) off Hogg. His courageous innings laid the foundations for the England victory.

when two of the four Australian specialist batsmen were out to rash strokes on successive balls, the Australian fate was sealed.

Australia resumed Thursday morning at 82 for two and it appeared that Yallop and vice-captain Kim Hughes would go for the target.

Shaky

Yallop and Hughes Wednesday had held the shaky innings together with slow and prudent play after openers Rick Darling and Graeme Wood had been dismissed for only 36. Yallop, who needed 130 minutes for his 16 Wednesday, hit out strongly Thursday morning.

But when he was bowled on 76 by Mike Hendrick and Hughes was caught by Gower off the same bowler for 46, the Australian innings collapsed.

Allan Border could add only one run to the score before falling to paceman Willis and Bruce Yardley was out to Hendrick first ball—caught brilliantly by England captain Mike Brearley in the slips.

PRUDENT: Vice-captain Kim Hughes plays down to Geoff Miller as he grinds his way to a prudent 30 at close of play Wednesday evening. Thursday morning, he failed to connect and was out for 46.

OH DARLING: Opener Rick Darling stares in horror at his fallen wicket as he is clean-bowled by Ian Botham for 18 Wednesday.

WSC Australia pacemen leave World XI reeling

SYDNEY, Feb. 2 (AP)—The Australian pace attack of Dennis Lillee, Gary Gilmour and Len Pascoe has put the Australians in the box seat in the World Series Cricket Super-test grand final against the World XI at the Sydney Cricket Ground.

The Australians managed only 172 in their first innings but at stumps Thursday night had the World XI reeling at eight wickets down for 100.

Keeper Alan Knott was not out on five and paceman Garth Le Roux not out on nine. Wickets tumbled quickly throughout the day on a pitch which had appeared as if it would be a good batting strip when Australian captain Ian Chappell won the toss and decided to bat.

But Le Roux extracted surprising bounce to have the Australians in trouble.

The big South African finished with six wickets.

The young Englishman David Hookes scored top score with 33 before he was caught behind by Knott off Procter. Earlier, opener Wessels had fielded on to score 27 before falling to Procter, caught by Richards.

Pascoe, with 25, and Gilmour, with 27, were the only other Australians to reach double figures.

Leading the Australian bowlers, Lillee ended the day with the excellent figures of 4-40.

JOINT VENTURE IN CONSTRUCTION BUSINESS

A BANGLADESHI GOVERNMENT APPROVED INTERNATIONAL CONSTRUCTION COMPANY IS INTERESTED IN ALL TYPES OF MEDIUM AND LARGE CONSTRUCTION WORKS IN MIDDLE EASTERN COUNTRIES UNDER JOINT VENTURE / SPONSORSHIP OR IN ANY REASONABLE TERMS. WITH THE WORLD FAMOUS AND CHEAP BUT HIGHLY QUALIFIED, WELL EXPERIENCED, HONEST, SINCERE AND HARDWORKING BANGLADESHI MANPOWER, INSHA ALLAH WE WILL BE ABLE TO EXECUTE LARGE SCALE CONSTRUCTION WORKS OF ANY NATURE.

VITA

Dear Vita Friend,

We wish to take this opportunity to introduce ourselves, as well as the excellent facilities we have to offer:

The Vita Food Company is the latest addition to the Saudi Arabian industrial scene, conveniently situated in Modern Premises, on the Dammam Industrial Area.

The Vita Company offer, for your benefit.

1. Large stocks of Prime quality Meat Products From Australia and the U.S.A.
2. A Modern cold store.
3. Hygienic, Air Conditioned, Production Areas.
4. Prompt Delivery, in Modern Refrigerated Vehicles.
5. Individual attention to your special requirements.
6. Complete service for the catering and Retail Trades. Suppliers of Fresh, and Frozen, Vegetables and Fruit.
7. Very competitive prices.

For Immediate attention, call us on 29450 and our Representative will be pleased to call and discuss your requirements.

Yours Sincerely,
THE VITA FOOD CO.
Dammam, Saudi Arabia Industrial Area.

Gavaskar propels India to great start

KANPUR, India, Feb. 2 (R) — Ace batsman Sunil Gavaskar launched India on a profitable day's batting in the sixth and final Test against the West Indies here Friday by clouting 40 runs in 51 minutes.

Gavaskar hit two sixes and five fours, and with his fellow opener Chetan Chauhan and Gundappa Viswanath also scoring heavily though more sedately, India was 249 for three at the end of the first day's play.

Chauhan, who made 79, assisted Gavaskar in an opening partnership of 51. Then he put on 144 for the third wicket with Viswanath, who was 94 not out at the close.

Gavaskar's explosive innings ended when he edged a delivery from Malcolm Marshall to wicketkeeper David Murray. Dip Vengarkar fell for 15 with the total 77, but Chauhan and Viswanath, overcoming early hesitancy, batted with flair in their big stand, which lasted 208 minutes.

It was broken not long before the close when Chauhan, five runs short of his best Test score, attempted a drive in spinner Derek Parry's first over of the day, but missed the ball and was stumped by Murray.

Patient Miandad anchors Pakistan

CHRISTCHURCH, New Zealand, Feb. 2 (R) — A patient innings of 81 by Javed Miandad guided Pakistan's cricketers to 220 for six at the close of the first day of the first Test against New Zealand here Friday.

Miandad came in an hour before lunch with Pakistan precariously placed on 48 for two. He carefully rebuilt the innings during his four-hour stay and Pakistan had advanced to 198 when he was sixth out.

New Zealand captain Mark Burgess sent the Pakistanis in after winning the toss and although wickets fell at regular intervals, the bowlers did not find the assistance in the pitch they probably expected.

Heading practice times

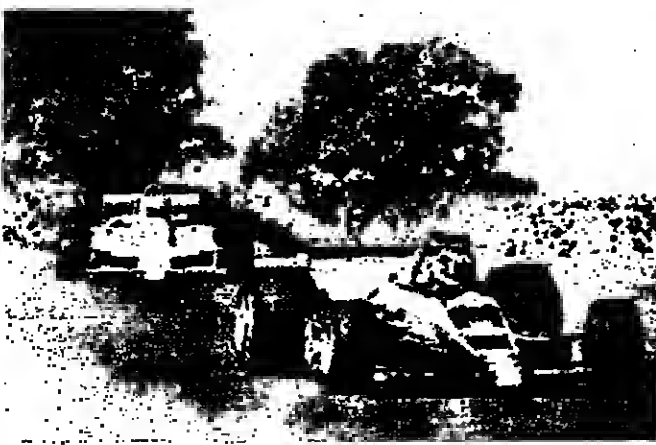

Lotus, Ligier may dominate Brazilian GP

By Graham Williams
INTERLAGOS, Brazil, Feb. 2 (R) — The French Ligiers are the cars to watch at the Brazilian Formula One Grand Prix here Sunday.

At least, that is the opinion of current world champion Mario Andretti, who said competing with the Ligiers is going to be really tough.

"Whatever they've found it's good. They won convincingly in Buenos Aires two weeks ago, and it's amazing to see a car apparently ahead of the others so early in the season," the American ace said.

Andretti said some changes had been made in the suspension of his Lotus since the Argentine Grand Prix in order to meet the Ligier challenge more effectively.

DOUBLE WINNER: Andre (L) Lotus teammate Carlos Reutemann edging N. Ireland's John Watson for second place in the Argentine GP two weeks ago—behind Ligier's Ligier. He will be looking to reserve that form in the Brazil race which he has won the last two years.

So far, the Ligier and Lotus teams look like dominating the front rows of the starting grid again. Their cars have been the only ones to break the two minutes 27 second mark in unofficial practice.

The Brazilian Grand Prix returns to Interlagos this year having been held last year at the Rio De Janeiro circuit.

Brazilian motoring authorities have not made any ruling as to where the race should be held in future, but the general opinion is that it should alternate between the two tracks from now on.

The Interlagos circuit on the outskirts of San Paulo has not undergone any significant changes since the 1977 Grand Prix, and still presents car and driver with one of the toughest tests in the Formula One calendar because of the hilly terrain and viciously twisting lay-out.

Andretti said at practice here "It's one of the tracks I like. It has real character and a tremendous variety of corners."

The Brazilian Grand Prix, now in its seventh year as part of the world championship circuit, has been dominated in the past by South Americans. Argentine Carlos Reutemann has won it for the past two years, and Brazil's former world champion Emerson Fittipaldi has also taken it twice.

Hours after 1st skier

Fire ravages Lake Placid ski jump

LAKE PLACID, New York, Feb. 2 (AP) — Fire heavily damaged part of the controversial 90-meter ski jump for the 1980 winter Olympics here, hours after the first skier to use the jump called it "fabulous."

The fire, which took about 14 hours to extinguish, will curtail jumping at the site, fire officials said.

A propane gas heater in the main elevator ignited at about 7:30 p.m., sending flames shooting up the shaft, said Ray Wilson of the Lake Placid Volunteer Fire Dept.

Wrexham wins—10th time lucky

LONDON, Feb. 2 (R) — Wrexham of the Second Division won its English Football Association (F.A.) Cup third round match easily 6-2 over Stockport when it was finally played on the tenth attempt at Wrexham Thursday night. Wednesday night-Fulham drew 1-1 with Manchester United in fourth-round game.

The fire, which was not labelled suspicious, was brought under control easily because "there wasn't really much else that could burn," Wilson said. Skiers can still walk up the jump or use a construction elevator.

Jay Rand, a native of this tiny village and former Olympic ski jumper, made the first jump Thursday. "It's fabulous."

It is the only 90-meter jump in the United States certified for World Cup competition.

McEnroe, Nastase score in Richmond tournament

RICHMOND, Virginia (AP) — John McEnroe breezed past Dean Joubert of South Africa and Lieke Nastase of Romania on Tuesday night in the second round of the Richmond tennis classic.

Second-seeded Guillermo Vilas of Argentina and third-seeded Brian Gottfried posted second round victories earlier in the day.

McEnroe, the tournament's top-seeded player, won 11 games in a row in defeating Joubert, 6-2, 6-1, in a match that took less than an hour.

Nastase eliminated Higuera, 6-4, 2-6, 6-2.

The fiery Romanian was assessed a penalty point by umpire Mike Blanchard for delaying the second game of the second set won by Higuera. Nastase's stifling tactics came

after Higuera had broken him in the first game of the set.

In a two-hour match that ended shortly before midnight, eighth-seeded Arthur Ashe ousted Ross Case of Australia 7-6 (7-4), 6-7 (7-5), 6-2.

In a \$200,000 women's tournament in Chicago, Martina Navratilova and Tracy Austin, the top two seeded players, breezed to straight-set victories Thursday night.

Navratilova, the defending champion advanced to the quarterfinals with a 6-3, 6-2 victory over unseeded Betsy Stove of the Netherlands in just 45 minutes.

The 16-year-old Austin, seeded second, also moved to the quarterfinals with an almost flawless 6-0, 6-2 victory over Mary Lou Piatek, 17, who was playing in her first major pro tournament.

Amin fight denied

TOKYO, Feb. 2 (R) — A promoter's report that Ugandan President Idi Amin is to fight a leading Japanese wrestler is completely groundless.

Ugandan Ambassador Samuel Bigombe said Thursday "The story ... that President Idi Amin of Uganda was to engage in a fighting contest with Japanese wrestler Antonio Inoki is absolutely false and tends to demean the highest office of the president of a friendly state," he said in a statement.

FALLAWAY: All-Star Elvin Hayes fallaway jump shot with 25 seconds remaining past Washington ahead against San Antonio Thursday night.

Pistons pound out 5th win in 6 games

NEW YORK, Feb. 2 (AP) — Bob Lanier and M.L. Carr poured in 29 points apiece for Detroit as the Pistons took a 120-116 victory over the Cleveland Cavaliers Thursday night.

Carr hit two free throws with 59 seconds left and Lanier hit three more in the final 16 seconds to preserve Detroit's fifth victory in its last six games. Campy Russell had 29 points and Austin Carr 26 for the losers.

Elvin Hayes and Bobby Dandridge, Washington's All-Star forwards, combined for 66 points and Tom Henderson hit

two key free throws with seven seconds remaining to beat San Antonio, 123-122. Hayes, who finished with 30 points, put the Bulls ahead for the first time since early in the second quarter with a three-point play with 1:07 left.

San Antonio's James Silas connected on a 30-footer with 59 seconds remaining to put the Spurs ahead 120-119 but Hayes threw in a fallaway jump shot with 25 seconds remaining to give the lead back to Washington.

Henderson then hit the two free throws that iced the game. Dandridge finished with 36 points, 26 in

the second half. George Gervin, the NBA's leading scorer, had 37 for the Spurs.

In other games Thursday, Darryl Dawkins ran the third quarter show with 12 points and teammate Julius Erving put on the finishing touches with a 15-point fourth quarter as the Philadelphia 76ers handed the Chicago Bulls a 128-105 defeat.

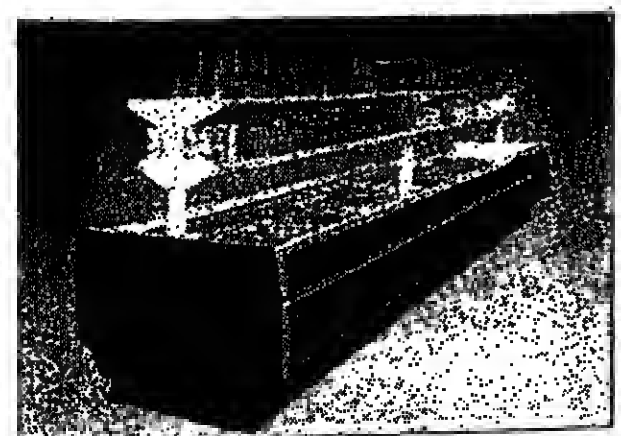

In Seattle, the Sonics' Lonnie Shelton slapped the ball loose from New Jersey's Eric Money and Fred Brown scored on a subsequent fast break as Seattle rallied in the final 30 seconds to defeat the Nets, 107-102.

British crude revenues seen going to waste

LONDON, Feb. 2 (R) — As Britain's North Sea oil production reaches its first 100 million tons, fears are emerging that revenues are going into a consumer boom instead of long-term economic investment.

The Energy Department said Thursday production from the North Sea oil fields last year was \$2.8 billion tons, pushing

Bonn bought most oil in 1978 from Iran

ESCHBORN, West Germany, Feb. 2 (R) — Iran was West Germany's top supplier of crude oil last year while oil imports from Britain nearly doubled over 1977 figures, the Federal Office for Trade and Industry has said.

It said Iran supplied 18.1 per cent of the 95.7 million tons of crude oil imported by West Germany in 1978, Iranian supplies were 9.6 per cent up on 1977, although total West German imports of crude fell by 2.5 per cent.

the total to date to 102 million tons.

The flow of Britain's badly needed oil has steadily risen since it began in June 1975, and December production was a record 5.59 million tons.

But the Governor of the Bank of England, Gordon Richardson, pointed out that the five billion sterling (\$10 billion) North Sea revenue to date — the bulk of it in 1978 — almost exactly matches the growth in personal consumption last year.

He told a meeting of bankers recently that North Sea oil had given Britain an unparalleled opportunity "radically to improve both our whole economic performance and with it a vital test of our will to do so."

"We could not expect to have that chance again," Richardson added.

Proven reserves on Britain's Continental Shelf are estimated at 1,405 million tons.

According to the Energy Department, about 25 billion sterling (\$50 billion) will have been invested in North Sea oil between 1968 and 1982.

Ford shareholders allege fund misuse

NEW YORK, Feb. 2 (R) — Dissident shareholders in the Ford Motor Co. have filed a \$50 million lawsuit charging Henry Ford II with squandering corporate assets on his personal life.

The lawsuit, filed this week in Manhattan Supreme Court, said Ford exhibited a "consistent pattern of misuse of corporate funds."

Ford has previously denied the charges and a Ford lawyer declined further comment, saying the company was not going to cooperate with a "publicity campaign."

The shareholders have also alleged that Ford, 62, was paid \$2 million in cash by Imelda, the wife of Philippine President Ferdinand Marcos.

The suit said she paid the money apparently to induce Ford to build a car parts plant in the Philippines.

Ford's estranged wife, Italian-born Christina Ford, is said to be a close friend of Mrs. Marcos.

The Philippine consulate in New York said "the allegation is absurd."

U.S. unemployment decreases slightly

WASHINGTON, Feb. 2

(AP) — The unemployment rate in the United States declined slightly to 5.8 per cent in January, showing that projected slowdown in the economy has not yet begun to occur, a U.S. government report showed Friday.

The jobless rate in December was 5.9 per cent, and the U.S. Labor Department noted in its report that unemployment has hovered at just below 6 per cent for the past six months. It has been at the 5.8 per cent level twice previously in recent months.

However, the administration

of President Carter predicts that unemployment will rise to 6.2 per cent during this year and remain at that level in 1980 as a result of government efforts to retard growth of the economy to help control inflation.

Both the percentage of the population who had jobs, 59.3 per cent, and the share of the population in the labor force, 63.7 per cent, were at an all-time high.

The Labor Department said total employment increased during the month by 450,000, with gains occurring in most major industries. Total employment was put at 96.3 million, while the number of Americans seeking jobs was 5.9 million.

Adult men accounted for most of the job gains in January, although unemployment declined among all population groups.

Argentina to ease curbs on car imports

BUENOS AIRES, Feb. 2 (AP) — The Argentine government has announced a long-range plan to put the middle class dream of new car ownership within reach of middle class pocketbooks by reducing restrictions on imported vehicles and parts.

A law signed Wednesday night by President Jorge Videla would cut tariffs from 95 per cent of an imported car's free-on-board price to 55 per cent by the end of 1981 and, during the same period, raise the proportion of imported parts allowed in locally produced automobiles from 4 to 12 per cent.

U.N. panel chief urges program to counter world economy ills

UNITED NATIONS, Feb. 2 (AP) — A new committee to work out an international development strategy for the 1980s has chosen a chairman and he immediately urged that it try to understand what ailed the world economy and "to grope towards an order in the midst of present disorder."

Muchkund Dubey, 45, joint secretary in the Indian Foreign Ministry, gave that advice after his election Thursday to the chairmanship at the first meeting of the preparatory committee for the New International Development Strategy, which is open to all with U.N. members.

The United Nations' two previous development strategies, adopted by the General Assembly in 1961 and 1970, set economic growth targets for developing countries and called for increased aid from developed countries in the respective decades of the 1960s and the 1970s.

The Assembly's resolution of last Monday creating the new committee suggests that the next development strategy look beyond the 1980s and, for example, seek to expand develop-

ing countries' share in world industrial output to 25 per cent by the year 2000.

Kenneth K.S. Dadzie of Ghana, U.N. director-general of Development and International Economic Cooperation, told the committee one question it faced was how far a strategy for the 1980s should be guided by perspectives running out to the end of the century and beyond.

He said another question was how best the strategy could reflect "the growing potential for cooperation" between "the Socialist countries... and the developing countries."

Industrialized capitalist countries sometimes chide industrialized Communist countries for not doing their fair share in

dishing out aid to developing countries.

Industrialized capitalist countries sometimes chide industrialized Communist countries for not doing their fair share in dishing out aid to developing countries.

Industrialized capitalist countries sometimes chide industrialized Communist countries for not doing their fair share in dishing out aid to developing countries.

♣ 10 2

The bidding:

South West North East

1 ♠ 2 ♠

3 NT Pass 4 ♠

Opening lead - three of hearts.

A fine declarer is forever

busy trying to assure the

contract whenever it's

possible to do so. He does not

relax his efforts merely

because he sees that the

contract is safe if the de-

clarer's cards are divided nor-

mally. He goes well beyond

this and caters to the

possibility that the cards are

divided unfavorably.

Here is a case in point. West

leads a heart won by South

with the ace. There does not

seem to be much to the play at

this point. Declarer notes that

he can ruff a heart in dummy,

arrange his play so that he

makes the contract whether

the trumps are divided 3-2 or

4-1. He does this by ruffing a

heart in dummy at trick two,

then leading a trump and

"finessing" the eight. South

certainly does not expect the

eight to win; he plays the eight

to maintain control of trumps

if they prove to be divided 4-1.

In the actual case, West

wins the eight with the nine

and can do no better than cash

his ace of diamonds to hold

declarer to eleven tricks.

It is hard to see that the

spades are divided 3-2. South

loses a trick unnecessarily

because of his safety measure;

but this 30-point loss is a very

cheap premium to pay for

avoiding a possible loss of

750 points.

What are the gnomes upto in Zurich

WEATHER

The northern and central areas will be affected by an air depression coming from the eastern Mediterranean. Winds will be active, raising dust and sand and low clouds will set the stage for scattered rain to parts of the Western Province. Rain clouds will also cover the western and southwestern highlands.

A marked drop in temperature throughout the country is expected.

Sea conditions in territorial waters will be moderate to choppy in the Red Sea and slightly choppy in the Gulf.

Late News

Ministers assail tactics

U.K. government tougher on strikes

LONDON, Feb. 2 (R)—Britain's government Friday took a tougher line against the tactics of trade union extremists pressing for huge pay rises.

Ministers and members of the Labor Party—normally an ally of the unions—hit out at wildcat pickets blockading hospitals, stopping burials and closing down schools.

After denouncing what he called "free collective vandalism" in parliament Thursday, Prime Minister James Callaghan called in four union leaders to tell them the

way in which strikes have been conducted was shocking the nation and ruining his re-election hopes.

Prices and Consumer Affairs Minister Roy Hattersley followed it up. In a radio interview Friday, he said it was time unions stood up against members who are giving them a bad name.

He denounced the behavior of some strikers as thoroughly indefensible.

Hattersley also dismissed as "fantasy" any idea that the government would authorize higher pay offers to 1.5 million low wage earners pressing for increases ranging up to 40 per cent.

Conservative opposition leader Margaret Thatcher called for a campaign against the "few thousand workers" in the union movement.

Speaking during a factory tour in London, she said she was appalled at the callous way strikers were picketing hospitals.

There was no let-up in industrial action. About 1,100 of Britain's 2,300 state hospitals were only accepting emergency cases because of sporadic stoppages by cleaners, kitchen staff, porters and other ancillary staff.

East London's Queen Elizabeth Hospital for Children—hit by a 24-hour strike Friday—turned away volunteers who offered to do strikers' duties. Hospital administrator Gail Sharp said she did not want to risk upsetting union organizers by accepting volunteers' assistance to clean wards and wash piles of dirty laundry.

Unions have absolutely rejected the employers' offer of eight per cent pay increases. Hattersley said it would mean Britain's financial ruin if the government gave local authorities the go-ahead to award even 15 per cent increases to the low paid.

Hattersley said the general election—which must be held by mid-November—should not take place until after the present industrial unrest has ended. "An election campaign now would be dominated by wild statements," he said.

The minority government is striving to reach some sort of pay agreement with the Trades Union Congress in the next few weeks to pave the way for the election campaign.

Callaghan had three hours of discussions Thursday night with leaders of the four unions involved in the low-paid workers' dispute. Apart from stressing his opinion about picketing at hospitals, he said industrial peace was crucial to electoral chances, aides reported.

Guerrillas release four whites captured in Rhodesian fighting

MAPUTO, Feb. 2 (R)—Guerrillas Friday freed four white men captured in Rhodesia during the past year, the first time they have released prisoners since the start of the war more than six years ago.

The men—two Britons, a Rhodesian and a South African—were handed over to representatives of the human rights organization Amnesty International in a poolside ceremony at a luxury hotel in the Mozambique capital.

The men were well-dressed and relaxed during the ceremony presided over by Robert Mugabe, president of the Zimbabwe African National Union (ZANU), whose forces had captured them.

Martins and Wigglesworth, describing their long trek into captivity in Mozambique, said there had been very tough times. But both said they had been well treated and spoke highly of the good discipline and high morale of their guerrilla captors.

The four chatted and joked among themselves before the

ceremony and told how they were captured and treated by the guerrillas.

ZANU officials stressed that they were being released for humanitarian reasons rather than to make political capital.

They were set free just after the end of a non-aligned conference on southern Africa.

Carters lead mourning for Nelson Rockefeller

NEW YORK, Feb. 2 (AP)—President and Mrs. Carter led an array of national and international dignitaries Friday in mourning the death a week ago of former Vice President Nelson Rockefeller.

The four-time governor of New York and vice president under Gerald Ford died Friday of a heart attack. He was 70. More than 70 nations were represented at the ceremonies at New York's Riverside church, built largely by Rockefeller money.

Accompanying Carter and his wife were New York's two senators, Jacob Javits and Daniel Patrick Moynihan. They

at which delegates of 25 states reaffirmed their support for the nationalist movements of the region.

The four were Johannes Hendrick Martins, 55, a South African, John Kennerley, 19, Rhodesian and Thomas Arthur Gigglesworth, 66, and James Black, 45, both British.

They were among scores of senators and representatives attending.

Others at the church on a morning of brilliant sunshine and 28-degree temperatures were former President Ford, Mrs. Lyndon Johnson, widow of the nation's 36th president, and Chief Justice Warren Burger.

The sizeable Rockefeller family contingent included his widow, Margaretta "Happy" Rockefeller, and their two children, former President Richard Nixon was invited but chose to pay his respects privately to Mrs. Rockefeller earlier in the week.

William Sloane Coffin, senior minister, officiated at the service. Martin Luther King Jr., father of the slain civil rights leader, offered a prayer. Former Secretary of State Henry Kissinger, a close Rockefeller associate, and David Rockefeller, chairman of Chase Manhattan Bank and Rockefeller's youngest brother, delivered separate eulogies.

Rockefeller's body was cremated Sunday and a private memorial service was held at the family estate in Pocantico Hills north of New York City. His ashes were buried Monday at a private cemetery in the grounds.

The Secret Service said that security was tight at the Riverside church and it was feared that armed agents were stationed inside the building.

Apparent heroin overdose

Sid Vicious found dead

NEW YORK, Feb. 2 (AP)—Punk rock musician Sid Vicious was found dead Friday, one day after he was released from jail in the slaying of his girlfriend.

Vicious apparently died from an overdose of heroin in New York City's Greenwich Village district.

Vicious, a native of England, was released from city jail Thursday on \$50,000 bail. He was accused of killing his 20-year-old girlfriend, Nancy Spungen, on Oct. 12 by stabbing her with a knife.

He had his bail revoked last month after a fracas in a New York night club during which he allegedly hit another man in the face with a beer mug.

Vicious was treated for drug addiction when he first was arrested last year. His original bail stipulated he continue to participate in a program for drug addicts, which included treatment with methadone, a synthetic heroin substitute.

Two more to be set up soon

Jordan Valley settlement started

TEL TVIV, Feb. 2 (RI)—A new para-military village was established in the Jordan Valley Friday by members of the Nahal (fighting and farming youth) wing of the Israeli Army.

Military sources said that the village of Na'amah north of Jericho, and below sea-level was the first of three new Nahal villages to be established

under a government decision a month ago.

Two others—in the northern part of the Jordan Valley and in the Gaza Strip—are to be established shortly, the sources said.

The government says that the United States agreed at the Camp David summit conference last year that para-military settlements could be set up as

part of Israel's defense measures.

The sites for Nahal settlements are chosen by army headquarters. Most such settlements become permanent civilian villages when the young men and women soldiers complete the three-year military training they undergo while farming land in the vicinity.

From page one

Opposition

Bakhtiar also insisted he would not again allow Iran to sink into dictatorship—a clear reference to the personality cult which has sprung up around Khomeini.

In Washington earlier, the United States Thursday reacted cautiously to developments in Iran, saying only the administration was watching the situation closely and was con-

cerned about the safety of U.S. citizens there.

Khomeini, on his return, called for the overthrow of Bakhtiar's government. He called Bakhtiar an American puppet.

He also said foreigners and foreign advisers should be driven out of Iran.

"Obviously I am not in a position to interpret what the Ayatollah said," State Depart-

ment spokesman Hodding Carter told reporters. "It is our firm desire for the restoration of peaceful conditions in Iran."

He added that the United States was clearly concerned about the safety of its citizens in Iran but said no mass evacuation of the remaining 5,000 U.S. nationals in Iran had been ordered.

Teng

While in Atlanta Teng said that the United States and China to oppose Russia's expansionist policies.

His remarks came at about the same time Teng said the official Soviet news agency, issued a dispatch urging the Carter administration to clarify its position on anti-Soviet statements by Teng during his visit.

Kingdom

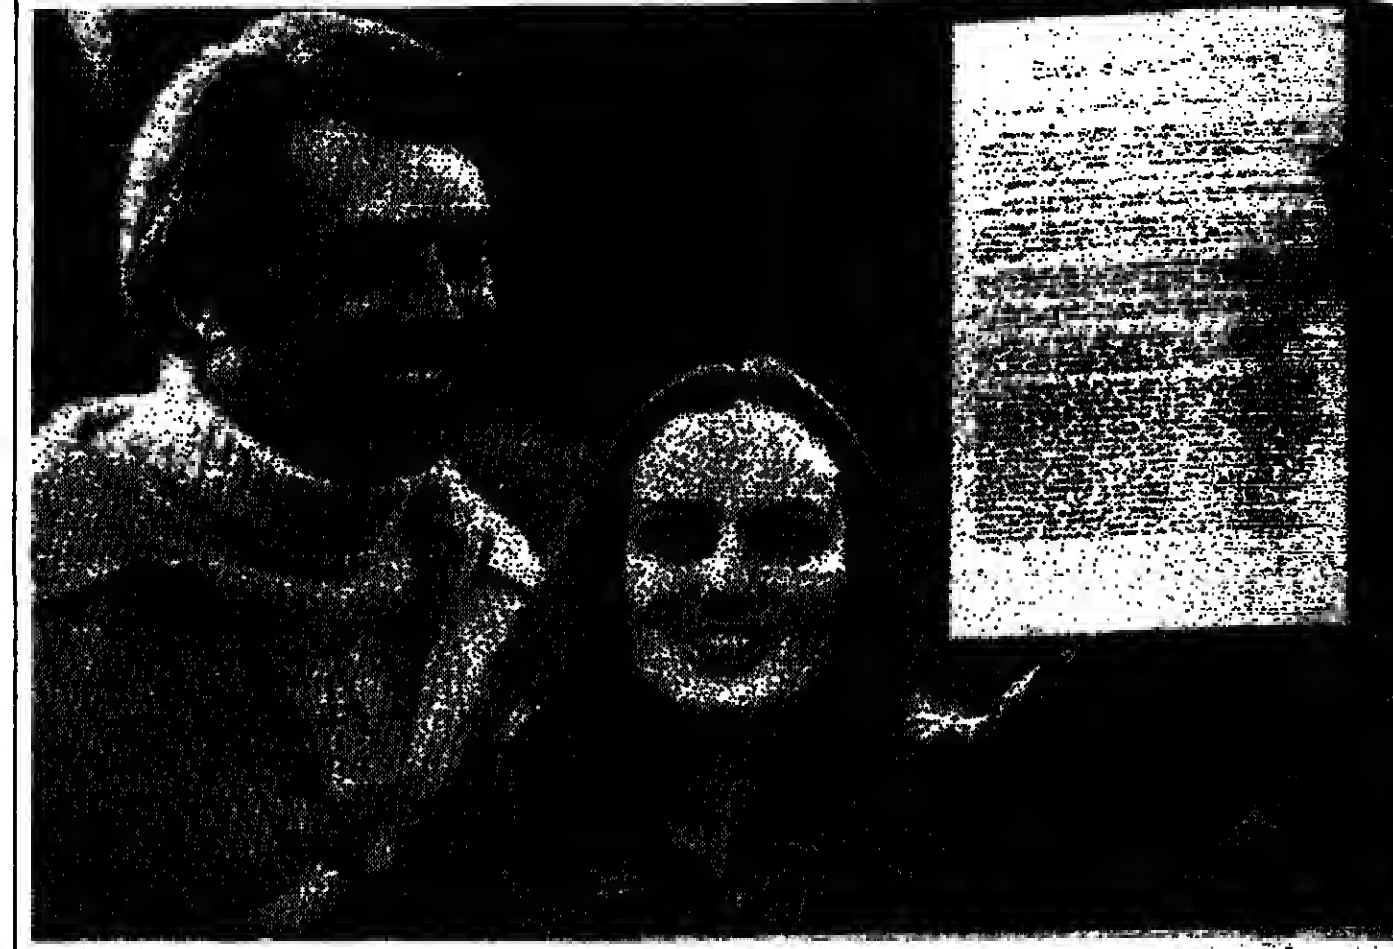

enormously in recent years. Between 1972 and 1977, he said, German exports to Saudi Arabia jumped fifteen-fold, from SR 294 million to SR 4.3 billion. Saudi exports to Germany went from SR 736 million in 1972 to SR 4.4 billion in 1977, he said.

Between 1974 and 1978 he said, Saudi Arabia signed 76 contracts with German firms valued at SR 24.1 billion. By the beginning of 1979 German capital had participated in 55 projects with Saudi capital, of which 30 were industrial enterprises, valued at SR 931 million in which German capital accounts for 31 per cent of the total investments.

"Joint ventures and companies are the best form for the development of foreign trade by the industrialized states," he said, stressing the importance of technological cooperation which he said was the foundation for a successful partnership between two countries at different stages of development. "This is something that we set great store by," he said.

Aba Al-Khail said that an indication of the importance of trade relations between the two countries may be found in the fact that Saudi exports to Germany accounted for 2.9 per cent of total Saudi exports in 1977 while its imports from Germany rose to 8.4 per cent of its total imports.

During the commission meeting, the two countries discussed various aspects of cooperation including economic, industrial, agricultural, technical, water resources petroleum and mineral technological and vocational training

With defector's information

Bonn spy roundup has caught 16 agents

BONN, Feb. 2 (AP)—Sixteen Germans from a shocking array of sensitive jobs have been implicated so far in a major roundup of alleged Communist spies unmasked by an East German defector.

A Bavarian state politician, a reporter for West Germany's biggest newspaper, a senior civil servant working for the army and a nuclear physicist in France were among the 10 persons under arrest, Federal investigators said.

Four more alleged East German agents are still being sought, including a nuclear power company official who escaped en route to jail in Karlsruhe.

Two other West Germans

named by the defector from the East Berlin security agency but investigators are still looking into their pasts.

The crackdown, which reached into France late last week, spread to Vienna, Thursday when state security police swooped on eight apartments and picked up an undisclosed number of persons suspected of being foreign agents.

The raids in Vienna, Austrian officials said, were prompted by information provided by Werner Schiller, the 45-year-old lieutenant in the East German Ministry for State Security who escaped to West Berlin with his wife and daughter Jan. 19.

Information brought through

the wall by Schiller has led to one of the biggest known crackdowns in West Germany's "playground of spies," where at least 3,000 Soviet-bloc agents are estimated by West German officials to be operating in virtually all walks of life.

More than 100 Communist agents have been arrested in West Germany since 1974, when the discovery of a spy in the Chancellery led to the resignation of Chancellor Willy Brandt.

Gunter Guillaume was among the 95 per cent working for the East Germans. The 51-year-old former Brandt adviser is serving a 13-year sentence for high treason, and his 50-year-old wife Christel

an eight-year term for treason and complicity in "acting as her husband's courier."

But the East Germans have infiltrated spies on all levels of German government, industry, and hardly a neighborhood goes by without another agent.

Defense Minister Georg Leber resigned under fire in 1978 after a six-month spy ring, including two spies and a secretary, was uncovered at his ministry in Bonn.

They are on trial for treason in Düsseldorf, accused of feeding more than 1,000 West German and NATO intelligence documents to East Germany in one of the Communist biggest postwar espionage coups.

News briefing, service canceled

Israel bans gathering of Arab mayors

HEBRON, West Bank, Feb. 2 (R)—The military governor of the occupied West Bank, who Thursday banned a press conference called by local Arab mayors, Friday prevented them from attending morning prayer services near Hebron.

Hebron Mayor Fa'ad Kawasma had invited foreign newsmen to a press conference at his town hall Friday to hear complaints about recent Jewish settlement activities on the West Bank.

But shortly after his invitations were telephoned to newsmen, he was informed by the military governor that the meeting was banned as it was political in nature and was therefore not permitted because it might inflame local feelings between Jews and Arabs, mu-

nicipal sources said. Political activity by local leaders has been banned since 1967 when Israel captured the area.

Security sources said the mayor had therefore organized a mass prayer meeting by mayors and religious leaders from the West Bank, at the cave of Machpelah outside Hebron, traditional site of the tombs of the Biblical patriarchs venerated by Jews and Mus-

lims. Their convoy of cars was turned back at a roadblock near the village of Halhul just north of Hebron, where speeches were delivered by several mayors denouncing a new timetable for Jewish and Muslim worship at the site.

The Defense Ministry two weeks ago amended a previous timetable established by the labor government some years ago, giving Jews more time for

prayers than formerly, allowing them to use an additional part of the site.

Muslims complain that Jewish residents of the Kiryat Arba suburb of the Arab town of Hebron, where many Muslims and supporters of the nationalist Gush Emunim of the faithful live, are praying at the cave while and escorted by guard
